Abstracts

According to Statistics MRC, the Global UHT Milk Market is accounted for \$86.9 billion in 2026 and is expected to reach \$160.8 billion by 2034 growing at a CAGR of 8.0% during the forecast period. Ultra-high temperature (UHT) milk is pasteurized milk that is exposed to ultra-heat for a short time to kill any unwanted and harmful bacteria that may be present in raw milk without losing any of its nutritional content. After pasteurization, it becomes lighter and requires less processing time, making it extremely safe to consume. It provides various nutrients, such as protein, calcium, carbohydrates, zinc, potassium, magnesium, phosphorous, riboflavin, and vitamins A and B12. Compared with fresh milk, it has a longer shelf life at room temperature.

According to ProCon.Org data from 2022, Canada has 59% and the United States has 36% of the lactose-intolerant population.

Market Dynamics:

Driver:

Extended shelf life

The extended shelf life of UHT milk is a pivotal driver fueling its prominence in the market. The UHT processing method involves heating milk to ultra-high temperatures for a short duration, effectively sterilizing it and eliminating harmful bacteria. This

process endows UHT milk with a significantly longer shelf life compared to traditional pasteurized milk. The absence of bacteria ensures that the milk remains microbiologically stable, delaying spoilage and extending its usability.

Restraint:

Price sensitivity

The UHT process involves specialized equipment and packaging technologies, contributing to a slightly elevated production cost. This cost is often transferred to consumers, making UHT milk relatively more expensive on store shelves. Price sensitivity arises from the fact that consumers have limited purchasing power and are more inclined to choose lower-priced alternatives. This can hinder the widespread adoption and growth of the UHT milk market.

Opportunity:

Product safety and hygiene

Product safety and hygiene stand as crucial drivers in the UHT (Ultra High Temperature) milk market, playing a pivotal role in consumer trust and market growth. Consumers, increasingly conscious of food safety and hygiene, are drawn to UHT milk due to its inherent properties that reduce the risk of bacterial contamination. The hermetic sealing of UHT milk further enhances product safety, preventing external contaminants from compromising the quality of the milk.

Threat:

Packaging concerns

The complexity of these packaging materials, including the combination of plastic, aluminum, and paper, may hinder the market's growth as consumers increasingly prioritize sustainability. However, environmental consciousness has led consumers to seek eco-friendly alternatives, pressuring the food and beverage industry to adopt more sustainable packaging solutions.

Covid-19 Impact

The emergence of COVID-19 has caused significant disruptions to the supply chain,

variations in demand, production halts, and shortages of raw materials in the UHT milk industry. The dairy sector has been facing unprecedented challenges, and it was not possible to completely cut down milk production owing to low demand and supply issues. Moreover, there have been disruptions to both the raw material supply and the output of dairy products simultaneously.

The skimmed UHT milk segment is expected to be the largest during the forecast period

The skimmed UHT milk segment is estimated to hold the largest share, due to the extended shelf life and convenience. The production of skimmed UHT milk involves removing the majority of the fat content through a separation process before subjecting it to the UHT treatment. This results in a dairy product with significantly reduced fat content, making it a preferred choice for health-conscious consumers seeking a lighter and leaner option. Moreover, as dietary consciousness continues to grow and with an increasing emphasis on healthier food choices, the market for UHT milk is expanding.

The powder segment is expected to have the highest CAGR during the forecast period

The powder segment is anticipated to have lucrative growth during the forecast period. The powder form of UHT milk offers several advantages, including extended shelf life, ease of storage, and reduced transportation costs due to its lower weight and volume. Additionally, the convenience of UHT milk in powder form extends its applications to various industries, including the food and beverage sector, where it serves as a key ingredient in the production of reconstituted milk, bakery products, and confectioneries.

Region with largest share:

Europe commanded the largest market share during the extrapolated period owing to the longer shelf life, and changing consumer lifestyles. With a well-established dairy industry and advanced processing technologies, European consumers appreciate UHT milk's ability to offer a reliable and convenient source of dairy without the need for immediate refrigeration. Additionally, the portability of UHT milk makes it a popular choice for travel and outdoor activities.

Region with highest CAGR:

Asia Pacific is expected to witness profitable growth over the projection period. The region's diverse and expanding population coupled with rapid urbanization and changing consumer lifestyles, has fostered a robust demand for convenient and long-

lasting dairy products, positioning UHT milk as a preferred choice. Furthermore, the rising middle class, increasing disposable incomes, and a growing awareness of UHT milk's safety attributes further fuel the market's expansion.

Key players in the market

Some of the key players in the UHT Milk Market include Groupe Lactalis SA, Danone SA, Nestlé S.A., Arla Foods a.m.b.a, Fonterra Co-operative Group Limited, China Mengniu Dairy Company Limited, Gujarat Cooperative Milk Marketing Federation Ltd., Dana Dairy Group, Yili Group and Hochwald Foods.

Key Developments:

In December 2023, Groupe Lactalis S.A. agreed to acquire Dairy Partners Americas Brasil Ltda. from Fonterra Co-operative Group Limited and Nestlé S.A. for BRL 700 million.

In July 2022, Danone has launched the new Dairy & Plants Blend baby formula to meet parents' desire for feeding options suitable for vegetarian, flexitarian and plant-based diets, while still meeting their baby's specific nutritional requirements.

In August 2021, Danone SA announced an expansion of its one-year-old partnership with Brightseed, creator of the Forager artificial intelligence, which maps and predicts the health impact of plant-based compounds.

Product Types Covered:

Skimmed UHT Milk

Semi-Skimmed UHT Milk

Full-Cream UHT Milk

Sources Covered:

Animal-based Milk

Plant-based Milk

Forms Covered:

Liquid

Powder

Distribution Channels Covered:

Specialty Food Stores

Grocery Stores

Convenience Stores

Other Distribution Channels

Regions Covered:

North America

US

Canada

Mexico

Europe

Germany

UK

Italy

France

Spain

Rest of Europe

Asia Pacific

Japan

China

India

Australia

New Zealand

South Korea

Rest of Asia Pacific

South America

Argentina

Brazil

Chile

Rest of South America

Middle East & Africa

Saudi Arabia

UAE

Qatar

South Africa

Rest of Middle East & Africa

What our report offers:

- Market share assessments for the regional and country-level segments
- Strategic recommendations for the new entrants
- Covers Market data for the years 2023, 2024, 2025, 2026, 2027, 2028, 2030, 2032 and 2034
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances

Contents

1 EXECUTIVE SUMMARY

2 PREFACE

- 2.1 Abstract
- 2.2 Stake Holders
- 2.3 Research Scope
- 2.4 Research Methodology
 - 2.4.1 Data Mining
 - 2.4.2 Data Analysis
 - 2.4.3 Data Validation
 - 2.4.4 Research Approach
- 2.5 Research Sources
 - 2.5.1 Primary Research Sources
 - 2.5.2 Secondary Research Sources
