According to Statistics MRC, the Global Vacuum Packaging market is estimated at \$23.56 billion in 2016 and is expected to reach \$32.12 billion by 2022 growing at a CAGR of 5.3% from 2016 to 2022. Some of the key factors influencing the market growth include increasing household income as well as liking to spend for hygienic food, robust consumption of convenience and processed food and rapid industrialization in developing economies. However, high Cost of development and variation in environmental mandates across regions are some factors hampering the market growth. Moreover, emergence of new technologies provides huge growth opportunities for the market in the coming years.

Amongst Packaging Material, polyethylene (PE) segment acquired the largest market share in the global market. Polyethylene's low production and processing cost has fuelled PE demand from packaged food industry. In addition, polyethylene is anticipated to continue its dominance followed by polyamide over the next seven years. Asia Pacific region held the largest market share in the global market during the forecast period. Growing preference for a healthy lifestyle coupled with the increasing demand for milk and milk-based products, rising healthcare expenditure is driving the market in this region.

Some of the key players in the market include Coveris Holdings S.A., Amcor Limited, Bemis Company, Inc., ULMA Packaging, S.Coop, Orics Industries, Inc., Sealed Air Corporation, Multisorb Technologies, Inc, Linpac Packaging Limited, Berry Plastics Corporation and CVP Systems, Inc.
