Abstracts

According to Statistics MRC, the Global Vegan Pet Food Market is accounted for \$8,667.97 million in 2020 and is expected to reach \$18,179.02 million by 2028 growing at a CAGR of 9.7% during the forecast period. Factors such as growing number of pet owners, rising disposable income, and increasing awareness regarding pet health are driving the growth of the market. However, nutrient deficiency associated with vegan pet food is hampering the growth of the market.

Vegan pet food is made with plant-based and natural ingredients without having any animal derived raw materials thereby ensuring no cruelty or exploitation of animals. It is healthy and easy to digest, which makes it more desirable than ordinary pet food.

Based on the product, the dry food segment is anticipated to expand at a rapid pace during the forecast period owing to its low moisture content and longer shelf life. By geography, Asia Pacific is going to have high growth during the forecast period which can be attributed to the development of new and innovative products by the manufacturers in the region.

Some of the key players profiled in the Vegan Pet Food Market include Bond Pet Foods, Inc, Vegan4dogs, Antos B.V., V-dog, Isoropimene Zootrofe Georgios Tsappis Ltd, Wild Earth, Soopa Pets, Benevo, Halo Pets, and YARRAH.
