Abstracts

According to Statistics MRC, the Global Vein Finders is accounted for \$126.90 million in 2017 and is expected to reach \$571.52 million by 2026 growing at a CAGR of 18.2% during the forecast period. Rise in the geriatric population prone to chronic ailments and need for admittance to hospitals, increase in the need for cosmetic surgeries, increase in obesity due to sedentary lifestyles, and technological breakthroughs including the launching of passive vein finders are the key driving factors for the market growth.

Vein finders are essential tools used by health care professionals during venipuncture procedures that enable detection of invisible veins without causing patient discomfort. These are advanced devices used to detect veins under the skin to draw blood and IV access in various patient groups including geriatric, obese, and people of color where it is difficult to find veins.

Based on technology, Ultrasound segment is estimated to have the highest market during the forecast period. This technology uses soundwaves to help image venous structures and surrounding tissues on a screen for the technician. A strong pulse of sound is sent into the body from the transducer and the reflection of the pulse is detected to map the deeper structures. A new version of the Ultrasound that detects blood flow is called Doppler Ultrasound because it can detect the flow of blood from the shift in frequency of the reflected wave from an object. The use of Ultrasound during vein access is mostly for deeper veins 6 mm or more the skin. By geography, North America is projected to dominate the overall market by contributing a major chunk of revenue during the estimated time span. Apart from this, the increase in the frequency of medical surgeries in countries such as the U.S. has prompted the product demand in the region.

Some of the key players profiled in the Vein Finders include AccuVein Inc, B. Braun Melsungen AG, Becton Dickinson and Company, Christie Medical Holdings Inc, DOSIS

MandM, Easy-RN, InfraRed Imaging Systems, Koninklijke Philips N.V., Lotusun, Near Infrared Imaging Inc, Rectus Energy, Rencongzhong, Sharn Anesthesia, Sylvan Corporation, Teleflex Incorporated (VueTek Scientific LLC), TransLite LLC, Venoscope, VINO Optics, Vivolight, Vuetek, ZD Medical and Zhonglin.

Products Covered:

Benchtop

Handheld

Technologies Covered:

Infra-Red

Ultra violet

Ultrasound

Applications Covered:

Blood Draw/Venipuncture

IV Access

Other Application

Types Covered:

Active Vein Finders

Fixed Type Vein Finder

Non-Imaging Type Vein Finder

Passive Vein Finders

Portable Type Vein Finder

Wearable Type Vein Finder

End Users Covered:

Blood Bank

Blood Donation Centers

Clinics

Home Care Settings

Hospitals & Ambulatory Surgical Centers

Private Health Care Practices

Specialized Clinics

Veterinary Clinics

Regions Covered:

What our report offers:

Market share assessments for the regional and country level segments

Strategic recommendations for the new entrants

Market forecasts for a minimum of 9 years of all the mentioned segments, sub segments and the regional markets

Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)

Strategic analysis: Drivers and Constraints, Product/Technology Analysis, Porter's five forces analysis, SWOT analysis etc.

Strategic recommendations in key business segments based on the market estimations

Competitive landscaping mapping the key common trends

Company profiling with detailed strategies, financials, and recent developments

Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the clients interest (Note: Depends of feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances
