## Abstracts

According to Statistics MRC, the Global Vial Cap Sealing Machines Market is expected to grow at a CAGR of 7.2% during the forecast period. Factors such as increasing demand from pharmaceutical industry and increasing use of multipacks are propelling the growth of the market. The chances of breakage of vial caps can hinder the market growth. The technological advancement for automation, speed and accuracy of vial cap sealing machine provide better opportunities to the market.

The small bottles made up of glass or plastic like polypropylene are called as vials and used with unique capping to keep the liquid or powder in the vial safe from contamination. For crimped seals, high-class aluminum vial caps are used owing to its exceptional formability and strength, whereas for non-crimped seals, plastic vial caps are used which are made up of polypropylene and natural rubber. It is significant to use more precise method for capping or sealing the vial.

By number of heads at a time, a multi-dose vial segment is used for the parental management of more than one dose of medication. Multi-dose vials are also labeled by the manufacturers and compulsorily hold antibacterial additives to avoid the growth of germs and microbes.

By technology, the automatic vial cap sealing machines market segment accounted for the major shares of the vial cap sealing machines market. Existence of numerous features that drive manufacturers to fit these machines into their manufacturing lines will contribute to the growth of the automatic vial cap sealing machines market segment.
