According to Statistics MRC, the Global Window Cleaning Robot Market is accounted for \$50.39 million in 2017 and is expected to reach \$205.37 million by 2026 growing at a CAGR of 16.9% during the forecast period. Increase in the use of automation in a wide variety of applications for profit and industrial sectors and significant adoption of window cleaning robots in houses are the key driving factors for the market growth. However, high capital linked with window cleaning robots is estimated to hamper the global window cleaning robot market.

Window Cleaning Robot uses advanced sensors to guide itself around the cleaning surface in the most efficient path. The major difference between the two is that window cleaning robots clean windows instead of floors. Most robotic window cleaners typically feature a two-step cleaning process which begins with wiping off the dirt and then polishing the window.

Based on the product, fan assimilation segment acquired considerable growth during the forecast period due to its ability to be operated with mobiles and other smart features. By geography, Asia Pacific is anticipated to grow at a significant pace in the near future owing to the major presence of prominent players and due to the development in AI technology for use in cleaning robots.

Some of the key players profiled in the Window Cleaning Robot include Vorwerk Innovation, Ecovacs Robotics Co. Ltd., Hobot Technology, Inc., Zhengzhou Bangmi Smart Technology Co., Ltd., Mamibot, Inc., Windowmate, Cop Rose Robot Co. Ltd., Alfawise, Ilishim Global Co., Ltd., Baseltex, ALBOHES, Wellbots, Milagrow Business & Knowledge Solutions and WINBOT.
