Statistics MRC, are pleased to announce the latest publication of Global Wireless Patient Monitoring Market. Factors attributing the market growth are shortage of doctors and nurses, therapeutic treatment and growing incidence of cardiovascular disease, technological advancements in data recording, rise in the healthcare needs of the geriatric population. However, the lack of reimbursement, high cost and incapability to alert the caregiver for any complication are the restraints for the market growth. However, the increasing awareness for telemedicine and the replacement of older equipment with new wireless ones is likely to create an opportunity for the market. Security for the mobile monitoring devices, medico-legal issues and cost-effectiveness are few challenges witnessed by the market.

Based on application, for Diabetes Monitoring Device, the sensor implanted in the body identifies the level of glucose in blood. Recent developments in implantable sensors, can be used to incorporate insulin pumps, which allow for instant insulin administration. Consequently, there is high consumer demand for a continuous glucose monitoring system. Abbott launched the FreeStyle Navigator II CGM system in 2011 in some European countries.

Based on Product, Cardiac Monitoring System provides physicians the means to prescribe ambulatory cardiac monitoring procedures completely through wireless for their patients. The FDA cleared a portable cardiac monitoring device that offers ECG technology and a digital stethoscope for patients with heart disease. There are several FDA-approved ECG patch monitoring devices currently available. CardioMEMS is a passive, wireless, radiofrequency sensor implanted into the pulmonary artery that continuously monitors pulmonary artery pressure.

North America will dominate the market due to high purchasing power. Asia Pacific is expected to increase significantly due to increasing number of medical interventions.

Some of the key players in Global Wireless Patient Monitoring market are American TeleCare, Cardiocom, Carematix, Cybernet Medical Corporation, Drager Medical, GE Healthcare, Globalmedia Group, Honeywell HomMed, Infinium Medical, LifeWatch Technologies, MedtronicsInc, Philips Healthcare, St. Jude Medical and Welch Allyn.
