The report provides detailed insights on the market dynamics to enable informed business decision making and growth strategy formulation based on the opportunities present in the market.

The Global Aerospace & Defense Battery Market: Highlights

Batteries are used mainly for power back up and emergency systems, starting engine and APU and flight preparation in the global aerospace & defense industry. They play a crucial role in the aerospace industry as it supplies power to the aircraft industry in case of power failure. Batteries in the aircraft must be reliable, durable, light weight, lower in maintenance, lower in cost of ownership, and have an extended life. Nickel-Cadmium, Lead-Acid, and Lithium-Ion batteries are the major types of batteries used in the global aerospace & defense industry. Industry is witnessing a gradual transition from the nickel-

cadmium to the lithium-ion batteries.

The global aerospace and defense battery market promises a strong growth opportunity and is likely to witness 6% CAGR during the forecast period of 2016 to 2021. Increasing commercial aircraft deliveries, growing aircraft fleet size, and advancement in the technology are some of the key growth drivers of the global aerospace & defense battery market. Commercial and regional aircraft mainly rely on the nickel-based batteries while general aviation on lead-acid batteries.

Narrow body and wide body aircraft are expected to remain the growth engine during the forecast period. Wide body aircraft is expected to experience the highest growth rate in the next five years, driven by higher demand of wide body aircraft. Major aerospace & defense aircraft OEMs have started using lithium-ion batteries in their next generation aircraft, such as A350 and F35.

North America is expected to remain the largest market for aircraft batteries during the forecast period due to being a manufacturing base of the largest commercial OEM (Boeing) and increasing retrofit market. Asia Pacific is expected to grow at the highest rate in the next five years.

The supply chain of this market comprises raw material suppliers, battery manufacturers, Aircraft OEMs, distributors, and Airline companies. The key aerospace OEMs are Boeing, Airbus, Bombardier, Lockheed Martin, Eurocopter, Embraer, ATR, and Mitsubishi Heavy Industries and key airline companies are Lufthansa, Delta Air, Air China, and Singapore Airlines.

The global battery market in the aerospace & defense industry is a highly consolidated market. The key battery manufacturers are Salt America Inc., GS Yuasa, Concorde Aircraft Batteries, and Quallion LLC. New product development and long term contacts are the key strategies adopted by the key players to gain competitive edge in the market.
