The Global Keyless Entry Systems Market in the Automotive Industry: Highlights

The automotive industry has been leveraging the potential of the electric and electronic components in most of the application areas to enhance passenger comfort and to increase safety and security features in the vehicles. One such example is the keyless entry system that was introduced about 20 years back. The keyless entry system uses integrated circuit that transfers the electromagnetic signals to lock or unlock the vehicle door. This system provides high convenience and enhances the security of the vehicle.

The global keyless entry systems market in the automotive industry offers a good

growth opportunity and is expected to witness 6.8% CAGR during the forecast period of 2016 to 2021. Increasing automotive production, stringent vehicle theft prevention regulations, focus on high comfort and convenience, and demand for high security vehicles are the major drivers of the global keyless entry systems market.

Remote keyless entry system (RKE) is the dominant entry system worldwide and offers optimum solutions to all the low cost auto vehicles. Passive keyless entry system (PKE) is likely to witness the fastest growth during the forecast period as it offers higher convenience and better security to the vehicle than traditional remote keyless entry system. There would be a continuous shift from remote keyless entry system to passive keyless entry system in the next five years.

Passenger car segment is expected to remain the largest market for keyless entry systems during the forecast period. High demand for better comfort and security vehicles and increasing car production will continue to drive the demand of the keyless entry systems in the passenger car segment.

Asia-Pacific region is expected to be the growth engine of the global keyless entry systems market in the next five years, driven by emerging economies, such as China and India. China is the world's largest automotive market having a good growth potential in the next five years.

The supply chain of this market comprises raw material suppliers, keyless entry system manufacturers, distributors, and Automotive OEMs. The key automotive OEMs are Toyota, Daimler, GM, Ford, Hyundai, and Chrysler.

The global automotive keyless entry systems market is a highly consolidated market. The key keyless entry system manufacturers are Continental AG, Hella Group, Delphi, Valeo, TRW Automotive, Alps Electric and Mitsubishi Electric Corporation. New product development, capacity expansion and regional expansion are the key strategies adopted by the key players to gain competitive edge in the market.
