Abstracts

This is the ONGOING report. If ordered it could be delivered in 2-3 weeks timeframe.

This report, from Stratview Research, studies the global golf cart market over the period 2010 to 2021. The report provides detailed insights on the market dynamics to enable informed business decision making and growth strategy formulation based on the opportunities present in the market.

The Global Golf Cart Market: Highlights

Golf carts are primarily used in the golf courses and country clubs by golfers to carry their clubs and other equipment. Golf cart saves labor & time, lets golfers transport their own clubs, lightens work for caddies, and encourages smoother and more enjoyable rounds. Apart from the golf courses & country clubs, golf carts are also preferred for carrying less heavy items or passengers for short distances in hotels, airports, shopping malls, and entertainment places. The golf car market has experienced significant decline over the past decade due to global economic crisis and limited number of golf courses and country clubs across the world.

The global golf cart market has a promising future with good growth opportunity and is

Global Golf Cart Market by Vehicle Type (Electric Golf Cart, Gas Powered Golf Cart, and Diesel Powered Golf Ca...

likely to witness 4.2% CAGR during the forecast period of 2016 to 2021. Recovery of the global economy and increasing the number of golf courses and country clubs are the major drivers of the golf cart market in the next five years. Additionally, increasing preference for the use of golf carts in hotels, resorts, airports, and shopping malls is likely to drive the golf cart sales during the same period. Major golf cart manufacturers, such as Club Car and E-Z Go are renovating the clubs with the purpose to attract the golfers.

Electric golf carts are the most preferred type across the globe because of their benefits, such as environmentally friendliness with no carbon emission and noise reduction. Electric golf carts are expected to remain the largest cart type during the forecast period.

North America is expected to remain the largest market for golf carts during the forecast period. High number of the golf courses and golfers is the primary reason behind North America's dominance in the golf cart market.

All the major golf cart manufacturers are strategically well aligned with the regional market dynamics and have their manufacturing bases in North America to tap the regional potential. They are also targeting other growth markets.

The supply chain of this market comprises raw material suppliers, component manufacturers, golf cart manufacturers, and distributors. The global golf cart is a consolidated market with global as well as regional players. The key golf cart manufacturers are Ingersoll Rand, Textron, Kawasaki Motors, E-Way, HDK Electric vehicles, and Cushman. New product development, renovation of the golf courses, and presence in the key markets are the key strategies adopted by the key players to gain competitive edge in the market.
