Abstracts

This is the ONGOING report. If ordered it could be delivered in 2-3 weeks timeframe.

This report, from Stratview Research, studies the global rare earth metals market over the period 2010 to 2021. The report provides detailed insights on the market dynamics in order to take informed business decision and build growth strategy based upon the opportunities present in the market.

The Global Rare Earth Metals Market: Highlights

The global rare earth metals market offers a good growth opportunity and is likely to grow at 5.6% CAGR during the forecast period of 2016 to 2021. Cerium oxide is the most dominant rare earth metal accounting for 38% of the market in 2015, followed by Lanthanum oxide with 24% share. Cerium oxide and Lanthanum oxide are cheaper than

other rare earth metals and are widely used in the metal alloys, catalysts, and glass phosphors.

Top three applications (permanent magnets, metal alloys, and catalysts), together accounted for 60% of the global rare earth metals market in 2015 and will continue to remain the dominant applications during the forecast period. Permanent magnets are likely to remain the growth engine during the forecast period driven by increasing penetration in traditional applications as well as emerging applications.

Asia-Pacific is expected to remain the largest consumer of the global rare earth metals market. China owns the largest reserves of the rare earth metals worldwide. China is both the leading producer as well as the consumer of rare earth metals. Imposition of restrictions on China's export and growing rare earth metals demand within China would create a demand supply gap in the rare earth metals market worldwide.

The global rare earth metals market is likely to witness significant changes in the coming years. New sources of supply are scheduled to be developed across the globe. China, which is the major producer of rare earth metals worldwide, is witnessing consolidation by state owned enterprises. China owns the largest reserves of the rare earth metals followed by Brazil. China will continue to remain the largest producer during the forecast period.

There is a presence of small to large scale producers of rare earth metals in China and worldwide. The key rare earth metal manufacturers are Inner Mongolia Baotou Steel Rare-Earth Hi-Tech Co Ltd., Molycorp Inc, China Minmetals Rare Earth Co. Ltd, Great Western Minerals Group Ltd., Alkane Resources Ltd, Arafura Resources Ltd., Lynas Corp., Avalon Rare Metals, Canada Rare Earth Corporation, and India Rare Earth Ltd.
