## Abstracts

### Executive Summary

As one of the biggest grain producing countries, China feed 22% population of the world with farmland merely 7% of the world. Moreover, China exports both processed and unprocessed food to Europe, U.S. and its neighbour countries. Hereby, China food safety is becoming an issue. Problems in pet food sold in U.S. at the beginning of 2007, and disputation from Japan on China “pesticide-tainted dumplings” at the beginning of 2008, drew further attention to China’s food safety issue.
