Abstracts

At present, China's telecommunication market maintained sound momentum. Total telephone subscribers rank the first, exceeding 600 million; growth rate of business income in 2008 is still higher than that of national GDP. Telecommunication business are under periods of transition and adjustment, its business structure become diversified, 3G network, Telecom Value-added Service include broad band access, mobile data, etc have become market development bright point.

With increasing reform on communication by Chinese government, "union of three" is becoming obvious. The third generation mobile communication technology is becoming mature in technology and market promotion, and together driven by 2008 Olympic and 2010 world expo, 3G will become the high starting point of business development platform and bright point in communication, thus bring the telecommunication industry sustainable development.

This article analyzes and summarizes our country's 3G technology, present condition and development of 3G market, distribution structure, mutual effect between all links, 3G facilities and domestic facility manufacturer, thus predicting its future and trend.

Contents
