Date: August 2008

Pages: 5

Price: US\$ 300.00 (Single User License)

ID: RF936A34A1BEN

Abstracts

Train swivel is one of the main modules of train turning parts. According to the planning of the Ministry of Railway, the existing 300,000 trains need to be renewed and reconstructed between 2005 and 2007 in order to meet the requirement of railway speed-up with an emphasis on the "walking parts ". High-end products like high speed & heavy load train swivel are in huge market demand. However, the railway equipment manufacturers in China lag in both technology and production capacity. Taking advantage of this huge gap, many international suppliers of railway industrial products have seized the Chinese market in succession.

Contents

1 USE AND CLASSIFICATION OF TRAIN SWIVEL

2 MARKET BACKGROUND OF TRAIN SWIVEL

3 TRAIN SWIVEL MANUFACTURERS

4 MARKET SIZE OF TRAIN SWIVEL

4.1 Locomotive Wheel

4.2 Axle

4.3 Spring Suspension Devices

5 DEVELOPMENT TREND

5.1 Holdbacks in Current Development

5.2 Future Development Direction
