Abstracts

In recent ten years, China's community hospitals and basic hospitals have been booming, which means China is experiencing the second stage that developed countries have already experienced, at the same time, home health care market is becoming popular. In Europe, production value of medicine and medical device product each stand 50% in total output of medicine is 50%, or each stand 60% and 40% respectively, while this data in China is only 9:1. In the future, home health care engineering is the major investment direction of a family, which means a rapid growth of home medical device market, in 2008, market growth rate of home medical device reached 28%. This report mainly analyzes the supply and demand of home medical device and its market competition status, and it puts forward relative policies and regulations of China's home health care.
