Abstracts

Telecomspricing looks at the key new trends in 5G services worldwide, focused on the last 12-month period January to December 2022.

The key changes over the period include the deployment of 5G services in more countries in Africa, Eastern Europe and South America, and the deployment of more 5G nodes in established 5G markets.

The introduction of 5G SA (Stand Alone) services: 5G SA is being introduced by more MNOs worldwide to provide improved 5G coverage in urban areas.

The introduction of 5G FWA (Fixed Wireless Access): FWA is being introduced by a number of MNOs as a high-speed Home Broadband product as an alternative to fixed line broadband services.

The introduction of domestic 5G services - e.g. EE (Everything Everywhere) has introduced a domestic 5G service offering improved 5G coverage within a house or building.

The introduction of 5G+ services: 5G+ services provide a higher download speed than traditional 5G, with theoretical download speeds of up to 1.3 Gbps. In Switzerland Swisscom has introduced a "5G Internet Booster" product which combines a copper wire access with the highest available mobile access speed.

Covered operators in the Tariff Report

Country/Operator
