## Abstracts

### About the report

Datacentrepricing's Data Centre Mediterranean report surveys the key Data Centre markets in nine-teen (19) countries around the Mediterranean region.

For each Mediterranean country, the report provides a summary of the Data Centre Providers and facilities by space and power, with profiles of the key providers and a forecast for Data Centre space, power, pricing & revenues from 2021 to 2025.

### About the Mediterranean Region

The Mediterranean region has a population of around 500 million, served by just under 500 Data Centre facilities and with a Data Centre raised floor space of around 1 million m<sup>2</sup>. From the 19-country markets, DCP finds that forecast Data Centre revenue growth rates will range from 41 per cent (Malta) up to 106 per cent (Israel) over the four-year period mid-2021 to mid-2025, with an average growth rate of 67 per cent across the Mediterranean Sea region.

For each country market there are three key drivers of growth impacting the Mediterranean region as a whole including:

The introduction of cloud services: In those countries with a number of Cloud Service Providers (CSPs) present there is a clear impact on Data Centre usage. This is most clearly seen in the Israeli market, where AWS, Google Cloud Platform, Oracle & Microsoft all aim to launch cloud services in Israel in 2021 to 2022, with an increase in Data Centre revenues.

The abundance of sub-sea cable connectivity: The Mediterranean is well served

by sub-sea cables connecting Europe with Africa, the Middle East & Asia. There are also cables planned from Portugal which will connect to South America. But not all countries have become a landing point hub. In France, Marseille has become a content hub which has generated a Data Centre cluster specialising in the hosting of content services to Africa, the Mediterranean, Middle East & Asia using direct connections to sub-sea cables.

The importance of content services: Content services are being established in 3rd party Data Centre facilities to serve local population centres and improve latency and performance. But the adoption of digital content is proceeding at different speeds. But some countries, such as Spain & Portugal, since the start of 2021 have seen the announcement of large new hyperscale Data Centres which, if realised, are set to transform their markets.

## Geographical coverage

Albania

Algeria

Bosnia & Herzegovina

Croatia

Cyprus

Egypt

France

Greece

Israel

Italy

Lebanon

Malta

Monaco

Montenegro

Morocco

Slovenia

Spain

Tunisia

Turkey

## Contents

The geographical location  
Key third-party Data Centre Providers and Facilities  
Key Data Centre developments  
Data Centre Space & Power Forecast  
Data Centre Pricing  
Data Centre Revenues Forecast  
Data Centre Public Cloud Forecast (where Public Cloud is offered)

## List Of Figures

### LIST OF FIGURES

Table 1 Population in each of the surveyed countries

Table 2 Number of Data Centres/Facilities in each of the surveyed countries

Table 3 Data Centre raised floor space / Power in each of the surveyed countries

Table 4 Data Centre Forecast Space in each of the surveyed countries

Table 5 Data Centre Forecast Power in each of the surveyed countries

Table 6 Data Centre Forecast Revenues in each of the surveyed countries

Table 7 Public Cloud Forecast in each of the surveyed countries

Table 8 Average Data Centre rentals (rack space) in Euro per month, excluding tax

Table 9 Electricity pricing in each of the surveyed countries

Figure 10 A simplified map showing the countries covered in the Mediterranean region (except Syria and Libya)

Figure 11 A simplified map showing the location and key and towns in Albania

Figure 12 A table summarising the key third-party Data Centre Providers and Facilities in Albania - as of the end of June 2021

Figure 13 A chart showing forecast Albanian Data Centre raised floor space (in '000's of m<sup>2</sup>) and DCCP (in MW) - from the end of June 2021 to the end of June 2025

Figure 14 A chart showing forecast Albanian average Data Centre rentals (rack space, m<sup>2</sup> & kw) in Euro per month - from the end of June 2021 to the end of June 2025 per annum in millions of Euros per annum

Figure 15 A chart showing forecast Albanian Data Centre revenues from the end of June 2021 to the end of June 2025 - in millions of Euros per annum

Figure 16 A simplified map showing the location and key and towns in Algeria

Figure 17 A table showing standard electricity costs by selected African Country Markets in USD per kWh

Figure 18 A table summarising the key third-party Data Centre Providers and Facilities in Algeria - as of the end of June 2021

Figure 19 A chart showing forecast Algerian Data Centre raised floor space (in '000s of m<sup>2</sup>) and DCCP (in MW) - from the end of June 2021 to the end of June 2025

Figure 20 A chart showing forecast Algerian average Data Centre rentals (rack space, m<sup>2</sup> & kw) in Euro per month - from the end of June 2021 to the end of June 2025 per annum

Figure 21 A chart showing forecast Algerian Data Centre revenues from the end of June 2021 to the end of June 2025 - in millions of Euros per annum

Figure 22 A simplified map showing the location and key towns in Bosnia & Herzegovina

Figure 23 A table summarising the key third-party Data Centre Providers and Facilities in Bosnia & Herzegovina - as of the end of June 2021

Figure 24 A chart showing forecast Bosnian Data Centre raised floor space (in '000s of m<sup>2</sup>) and DCCP (in MW) -from the end of June 2021 to the end of June 2025

Figure 25 A chart showing forecast Bosnian average Data Centre rentals (rack space, m<sup>2</sup> & kw) in Euro per month - from the end of June 2021 to the end of June 2025 per annum

Figure 26 A chart showing forecast Bosnian Data Centre revenues from the end of June 2021 to the end of June 2025 - in millions in Euro per annum
