## Abstracts

A new report published by TCL called Data Centre Pricing France 2014 to 2019, finds that French Data Centre capacity is growing throughout France in all segments, continuing a trend for the construction of new high specification Data Centre facilities.

According to the TCL survey, for the four year period since 2010, new French Data Centre raised floor space has increased by over 130,000 square metres. For the next 5 year period TCL forecasts that new space will continue to grow from a total of over 360,000 up to over 464,000 square metres – with over 20,000 square metres of new space to be added every year.

Average French Data Centre rack space is also forecast to grow from the present rate of Euro 821 per month to Euro 853 per month by the end of 2019. Prices will continue to be stable despite the introduction of new Data Centre space across France.

The French Data Centre market has a number of pricing tiers, with regional Data Centre facilities having rack space rates as low as Euro 500 per month, and colocation facilities (typically owned by Carrier Based Data Centres) also having particularly low pricing outside the Paris area.

The medium priced tier – with rack space pricing from Euro 750 up to Euro 850 per month – is composed of a mixture of regional Data Centre providers and Carrier Neutral Data Centres in the Paris area with standard facilities offering low bundles of power.

The higher Data Centre priced tier – with rack space from Euro 850 per month and above – is composed mainly of a number of Premium Data Centre facilities, typically based in the Paris area, which are able to support power bundles of 20 kW per rack as standard, but have price points as high as Euro 2,000 per month – often with power costs and IP connectivity included in the price.

TCL finds that Data Centres in the Paris area charge a premium price compared with their French regional counterparts, with space costing an average of 20 per cent more than outside the capital. Data Centres in the Paris area are typically larger, and have a wider range of connectivity options. These established Data Centres are at the heart of a digital ecosystem with content, hosting & network providers attracting a variety of customers.

The Paris Data Centre market continues to see investment in new facilities by a number of Data Centre providers including Equinix, Interxion, Iliad Group, Telehouse Europe & Global Switch.

But Data Centre pricing in France is becoming more complex over time. There are a large number of relatively small regional Data Centre facilities based outside the Paris area, in cities such as Lille, Marseilles, Nantes, Nice, Strasbourg, Lyon & Toulouse – with relatively low pricing, which is lowering the overall market average.

And frequently new Data Centre facilities that are being developed in France are offering discounted pricing to attract new customers, with promotions particularly common during the first year of operation for a new facility.

But French Premium Data Centre providers offer a higher price point, which is keeping overall pricing stable. And by bundling in power with rack space, IP connectivity and in some cases remote hands services as part of the rental fee the Premium Data Centre provider is both differentiating the service and maintaining a high price point which is raising the market average.

## Contents

### **INTRODUCTION – DATA CENTRE PRICING FRANCE – 2014 TO 2019 REPORT**

Research Methodology

The main Data Centre segments identified in the report

The Data Centre Tier certification used in the report

The PUE ratio used in the report

The French Data Centre Pricing used in the report

Other metrics used in the report

### **CHAPTER ONE – A MARKET OVERVIEW OF THE FRENCH DATA CENTRE**

Introduction

The landscape for the Data Centre market in France

The key Data Centre players in the French market

The French Carrier Based Data Centre segment

The French Carrier Neutral Data Centre segment

The French Premium Data Centre segment

Key Point Summary

### **CHAPTER TWO – THE AVERAGE PRICING FOR DATA CENTRES IN FRANCE**

Introduction

The average rack space pricing for French Data Centres

Installation charges

Administration charges

Average French Data Centre pricing per square metre per month

French Data Centre pricing for cage space

French Data Centre pricing for cross connects

Typical French Data Centre pricing for power

Basic French industrial power costs

Average customer power per French Data Centre facility

Average French Data Centre pricing per kW bundle per rack

French Data Centre Watts per square metre pricing

The main Data Centre trends taking place in France

French Data Centre pricing for supplementary services

A French Data Centre average price forecast from 2014 to 2019

Key Point Summary

## **CHAPTER THREE – THE FUTURE DEVELOPMENTS IN THE FRENCH DATA CENTRE MARKET**

Introduction

The key statistics in the French Data Centre market

The new French Data Centre developments

A forecast for French Data Centre raised floor space from 2014 to 2019

A forecast for French Data Centre monthly revenues from 2014 to 2019

A forecast for French Data Centre rack space pricing from 2014 to 2019

A forecast for French Data Centre pricing per sqm from 2014 to 2019

A forecast for French Data Centre pricing per kW from 2014 to 2019

The key trends taking place in the French Data Centre market

Key Point Summary

## **CHAPTER FOUR – CONCLUSIONS**

## **APPENDIX ONE – A GLOSSARY OF TERMS USED IN THE REPORT**

## **A LIST OF TABLES & CHARTS USED IN THE REPORT**

Figure 1: A table showing the forecast growth in the main French Data Centre segments in raised floor space from the end of 2014 to the end of 2019 (in square metres)
