About the Danish Data Centre Market

There are over forty third-party Data Centre facilities in Denmark.

There has been significant investment by Hyperscale Data Centres, including Apple, Facebook and Google in Denmark, attracted by low-cost renewable energy. New space is being added by Norwegian Data Centre Provider Bulk Infrastructure – with the

provider entering the Danish market with a facility located at subsea cable landing point to act as a content hub.

Denmark Data centre locations is spread across the country with only under thirty per cent in the capital. The Data Centre Market is forecast to grow by an average of 5,000 m² per annum.

New subsea cable systems are to be laid from North America to Esbjerg (and also to Norway) which will also increase transatlantic connectivity.
