Abstracts

Many of the key Data Centre Trends identified by Datacentrepricing are universal and re-occur across all of the geographical regions. The worldwide Data Centre market is forecast to grow by 73% over the next four years.

About the Report

The report is structured in three parts with Part I analysing the Top Ten key Global Data Centre Trends impacting the Data Centre segment worldwide from the end of 2022 to the end of 2026. For each of the ten trends, Datacentrepricing provides insight. For example, Trend I shows that Data Centre Providers are now spreading their Hyperscale Data Centre facilities around the world – away from the traditional Data Centre Metro clusters – or the so-called Tier I markets typically with 200 MW or more of Data Centre Power available, a list of these selected Hyperscale Data Centres under development is provided for each region.

Datacentrepricing examines in Part II of the report the Data Centre Landscape by Data Centre raised floor space and DCCP (Data Centre Customer Power) and provides some of the key new Data Centre developments that are due to take place in each of the surveyed regions, EMEA, Asia-Pacific and Americas.

In Part III, Datacentrepricing provides a series of forecasts for the Global Data Centre market from the end of 2022 to the end of 2026. The forecasts include the following four key metrics:

A Global Data Centre forecast – which is Data Centre raised floor space by region from the end of 2022 to the end of 2026 in m2

A Global Data Centre forecast – which is DCCP by region from the end of 2022

to the end of 2026 in MW

A Global Data Centre forecast – which is based on monthly average Data Centre rack space pricing by region from the end of 2022 to the end of 2026 in USD

A Global Data Centre forecast – which is based on Data Centre revenues by region from the end of 2022 to the end of 2026 in millions of USD per annum

Contents

METHODOLOGY

EXECUTIVE SUMMARY

PART 1 – THE TOP TEN KEY GLOBAL DATA CENTRE TRENDS – FROM THE END OF 2022 TO THE END OF 2026

Trend 1 - The build out of new Hyperscale Data Centres worldwide - into new markets

Trend 2 – The importance of Cloud services in driving Data Centre demand

Trend 3 - The raising of new finance for Private Equity investment in Data Centres

Trend 4 – The acceleration of Acquisitions & Mergers in the Data Centre space

Trend 5 – The importance of sustainability for the Data Centre

Trend 6 – The energy usage of Data Centres & a potential energy shortages

Trend 7 – The introduction of Data Centres into new developing markets

Trend 8 – The growth of Data Centre Metros & city clusters worldwide

Trend 9 – The future changes in Data Centre technology

Trend 10 – Projecting the Data Centre market in 2030 – the key forecast global changes by 2030

PART 2 – DATA CENTRE LANDSCAPES – DATA CENTRE SPACE, POWER, KEY PROVIDERS & NEW DEVELOPMENTS BY REGION (EMEA, AMERICAS & ASIA PACIFIC REGIONS)

EMEA region DC Landscape - Data Centre space, power, key providers & new developments

The key forecast Data Centre trends in the EMEA region

Americas region DC Landscape - Data Centre space, power, key providers & new developments

The key forecast Data Centre trends in the Americas region

Asia Pacific region DC Landscape - Data Centre space, power, key providers & new developments

The key forecast Data Centre trends in the Asia Pacific region

Summary – The increase in forecast Data Centre space, power & revenues by region & key trends

PART 3 – GLOBAL DATA CENTRE TRENDS – FORECASTS AND CONCLUSIONS FROM THE END OF 2022 TO THE END OF 2026

Global Data Centre forecast – Data Centre space by region from the end of 2022 to the end of 2026

Global Data Centre forecast – Data Centre power by region from the end of 2022 to the end of 2026

Global Data Centre forecast – Data Centre pricing by region from the end of 2022 to the end of 2026

Global Data Centre forecast – Data Centre revenues by region from the end of 2022 to the end of 2026

The key trends in the Global Data Centre market from the end of 2022 to the end of 2026

The Key Conclusions for the Global Data Centre market from the end of 2022 to the end of 2026

APPENDICES

Appendix I – A list of Data Centres included in the report

Appendix II – The exchange rates used in the report (converted from local currency into USD \$1)
