Abstracts

About the Report

This new report considers the growth of Data Centre space, power, pricing for Hungary.

The report shows the Revenues for Cloud and Data Centre Market forecast over the period from the end of 2022 to the end of 2026 and provides profiles of the key Public Cloud and Data Centre providers for Hungary.

About Hungary

Hungary is a significant market in the CEE (Central Eastern Europe) region, with over 30,000 m² of third-party Data Centre raised floor space available as of the end of 2022 and is a larger market than Romania but is significantly smaller than the Czechia market.

The Hungarian Data Centre market is forecast to see relatively modest growth, with no plans identified for large new Data Centre facilities, but with incremental growth from existing providers.

The Data Centre market to date has been dominated by two providers and requires new entrants to develop larger hyperscale Data Centre space.

Contents

A simplified map showing the key towns & cities in Hungary

The key third-party Data Centre Providers & Facilities in Hungary

The key Hungary Data Centre Provider Profiles
