## Abstracts

### SYNOPSIS

Pricing is used as one of the key differentiators by mobile operators across the industry. To keep up-to-date with the increased complexity of packages offered is a challenge.

Telecomspricing has researched and collated prices for post- and prepaid smartphone price plans across the Middle East since 2008 and has just released the latest edition covering 11 countries and 23 operators and over 300 price plans.

Prices presented in local currency, Euros and USD allows for a speedy and like-for-like comparison of the 3,000 and plus price plans covered.

Key information collected and provided in excel spreadsheet include:

Name of operator

Effective/Verified Date

Type of customer (Consumer, Youth, Senior etc)

Type of subscription (Postpaid/Prepaid,Hybrid)

Contract term for Postpaid plans(m-t-m, 6, 12, 18, 24 plans)

Validity for prepaid plans

Name of Plan

Cost in local currencies and Euro (inclusive and exclusive of tax)

Inclusive allowances such as Voice, IDD, SMS, MMS, Data, roaming VAS, other, a separate column for each of these)

Charges (per min, per SMS, per MMS, per 1 Mbyte of Data

Tax rate

Comments (these relate to the price plan and an provide additional information such as add-on details)

In this continuously updated service - every quarter - based on a survey of providers, the database will illustrate how operator marketing strategies create plans to retain loyalty, entice new customers and increase usage and value.

The database also highlights key changes announced by operators since the previous update which are easily identifiable as marked in red.
