About the Report

This new report considers the growth of Data Centre space, power, pricing for Romania.

The report shows the revenues for Cloud and Data Centre Market forecast over the period from the beginning of 2022 to the beginning of 2027 and provides profiles of the key Public Cloud and Data Centre providers for Romania.

About Romania

The Romanian Data Centre market has more than twenty third-party Data Centre Providers – but with a small average size of facility (an average of 395 m² of Data Centre raised floor space per facility).

The Romanian market is dominated by local Data Centre providers - with the largest Data Centre Provider being the incumbent telecoms provider Telekom Romania.

Romania to-date has not become a key destination for the public CSPs (Cloud Service Providers) with access to cloud typically being provided from Frankfurt (Germany) and other countries.

Romania is still a developing market with relatively small Data Centre facilities, and remains fragmented; it requires more investment in larger Hyperscale Data Centre facilities.

Contents

A List of Figures – Romania Data Centre Landscape
Methodology – Romania Data Centre Landscape
Data Centre Summary – Romania Data Centre Landscape
A simplified map showing the key cities & towns in Romania
The key third-party Data Centre Providers & Facilities in Romania
