Abstracts

About the Report

This new report considers the growth of Data Centre space, power, pricing for Slovenia.

The report shows the revenues for Cloud and Data Centre Market forecast over the period from the end of 2022 to the end of 2022 and provides profiles of the key Public Cloud and Data Centre providers for Slovenia.

About Slovenia

Slovenia has a relatively small third-party Data Centre market of raised floor space, with the largest Data Centre facility being 1,500 m². There has been relatively little large Hyperscale Data Centre developments in Slovenia.

New space is being added on an incremental basis only, with DCP forecasting growth with up to 1,000 m² per annum. Power utility costs remain around the European average, but Slovenian rack space rentals – along with Poland – remain among the lowest in Europe and are less than half of the Data Centre rental rates found in Western European countries such as the Netherlands, France, Germany and the UK.

Slovenia remains a market with further scope for Data Centre development, although it has an established Internet Exchange (SIX), with peak IP traffic (as of May 2021) of around 70 Gbps and over thirty (30) companies connected to the SIX.

Contents

Data Centre Summary – Slovenia Data Centre Landscape

A simplified map showing the key cities & towns in Slovenia

The Key third-party Data Centre Providers & Facilities in Slovenia

A table summarising the key Slovenian Data Centre Providers & Facilities

The key Slovenian Data Centre Provider Profiles
