Abstracts

Thailand has one of the smallest Data Centre markets in the Asia Pacific Region with well under 100,000 m² of Data Centre raised floor space as of the beginning of 2021 served by some 30 Data Centre facilities. Some of the Thai Data Centre Providers include – CAT Telekom, CS LoxInfo, NTT Com (Global Data Centers), True IDC, and others.

Thailand is seeing new individual hyperscale Data Centre investments – and is among the first large-scale Data Centre deployments in the country.

The Thai Data Centre market has seen relatively little new development and is growing from a low initial base, with the main development from STT GDC IDC.

Datacentrepricing forecasts that Data Centre space will increase by 92 per cent, power by 103 per cent and revenues by 109 per cent over the four-year period to the end of 2026.

There are seven key subsea fibre cables connecting Thailand and two new subsea cable systems are being planned from Thailand.
