## **Abstracts**

The Global Cheminformatics Market is projected to expand from USD 4.36 Billion in 2025 to USD 8.64 Billion by 2031, achieving a compound annual growth rate of 12.07%. This field utilizes computational strategies to organize and interpret chemical data, supporting the storage, retrieval, and modeling of molecular information. The market's upward trajectory is driven by the growing necessity for streamlined drug discovery processes and the handling of massive datasets generated by high-throughput screening. This momentum is supported by substantial industry funding; for instance, the European Federation of Pharmaceutical Industries and Associations estimated that the research-based pharmaceutical sector invested ?50,000 million in R&D across Europe in 2023. Such spending highlights the essential function of digital solutions in maximizing research productivity and shortening development cycles.

Conversely, market growth faces a significant hurdle due to a shortage of workforce talent holding combined proficiency in chemistry and information technology. This lack of specialized skills hinders the successful deployment of sophisticated informatics infrastructures. Furthermore, the industry struggles with data standardization inconsistencies across various platforms, which impede the seamless integration needed for collaborative scientific efforts. These interoperability challenges threaten to retard the widespread acceptance and application of these advanced technologies

within the sector.

## **Market Driver**

The rapid incorporation of AI and machine learning into drug discovery acts as a major propellant for the cheminformatics industry. These technologies empower scientists to forecast molecular interactions and refine lead compounds, creating a need for sophisticated software frameworks capable of managing complex data. This technological convergence is particularly crucial for small molecule design, where algorithms analyze extensive chemical libraries. A case in point is Eli Lilly and Company's January 2024 announcement regarding a strategic partnership with Isomorphic Labs, which included a \$45 million upfront commitment to advance AI-led drug design. Such alliances underscore the necessity of informatics platforms to connect computational forecasts with experimental validation in the lab.

Additionally, escalating R&D expenditures by pharmaceutical corporations serve as a primary catalyst for the market. Firms are directing significant funds toward digital transformation tools that optimize the research lifecycle to sustain competitive development pipelines. This financial backing enables the acquisition of essential screening and modeling software. As reported by Merck & Co., Inc. in February 2024, the company's full-year R&D expenses for 2023 surged to \$30.5 billion. This trend is further strengthened by regulatory requirements for strict data integrity; the U.S. Food and Drug Administration approved 55 new molecular entities in 2023, a volume that necessitates powerful informatics systems to handle the rigorous data management associated with regulatory submissions.

## **Market Challenge**

A critical obstacle facing the Global Cheminformatics Market is the shortage of professionals who possess dual competency in both chemistry and information technology. As biotechnology and pharmaceutical firms increasingly depend on computational techniques to model compound data, the requirement for staff capable of understanding scientific fundamentals alongside complex data structures has exceeded availability. This talent deficit creates barriers to the seamless implementation of informatics systems, compelling organizations to postpone the rollout of vital digital solutions. Without a workforce equipped to bridge these distinct fields, companies face difficulties in optimizing large-scale chemical data management, effectively halting key research and development endeavors.

Recent industry statistics confirm that this skills gap is widening, creating an operational bottleneck. According to the Pistoia Alliance, 34 percent of life science laboratories identified the lack of skilled personnel as a major impediment to adopting advanced digital technologies in 2025, a rise from 23 percent the prior year. This growing shortage of technical proficiency directly limits the market's capacity to maintain its expansion. If organizations fail to acquire the necessary human capital to manage these platforms, the anticipated efficiency improvements from cheminformatics remain out of reach, leading to prolonged development schedules and constrained market growth.

## **Market Trends**

The shift toward Cloud-Native and SaaS deployment models is transforming the Global Cheminformatics Market by supplanting rigid on-premise hardware with scalable digital platforms. This migration enables pharmaceutical companies to decentralize their research activities, promoting fluid collaboration among dispersed teams. By utilizing cloud infrastructures, organizations can effectively handle the rapid expansion of chemical data without incurring the heavy capital costs linked to traditional hardware. This strategic pivot is highlighted by leading industry players moving their digital operations to cloud frameworks; for instance, Veeva Systems announced in June 2025 an extension of its collaboration with AWS to support over 50 life sciences applications, emphasizing the sector's dependence on cloud-native environments for operational flexibility.

Simultaneously, the rise of specialized tools designed for biologics and large molecules is becoming increasingly significant as the industry shifts focus from small-molecule drugs to complex therapeutic proteins. This trend drives the creation of innovative informatics solutions tailored to manage the intricate structural data of biologics, which older systems cannot sufficiently process. As R&D pipelines place greater emphasis on large-molecule therapies, there is a surging need for specific software to model and simulate these entities. This market progression is bolstered by strong financial forecasts for biologics-dominated sectors; the IQVIA Institute for Human Data Science reported in June 2025 that global spending on oncology is expected to reach \$441 billion by 2029, underlining the urgent requirement for advanced informatics to sustain this growing field.

## **Key Market Players**

Agilent Technologies Inc.

Bio-Rad Laboratories Inc.

PerkinElmer NC.

Accelrys Software Inc.

Chemical Computing Group, Inc.

Certara, L.P.

Advanced Chemistry Development, Inc.

BioSolveIT GmbH

Dassault Systemes

ChemAxon Inc.

Eurofins Panlabs Inc.

Jubilant Biosys Inc.

Molecular Discovery Ltd.

OpenEye Scientific Software Inc.

SchrOdinger Inc.

## **Report Scope**

In this report, the Global Cheminformatics Market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

Cheminformatics Market, By Application

Chemical Analysis

Drug Discovery and Validation

Virtual Screening

Others

Cheminformatics Market, By End User

Chemical & Pharmaceutical Companies

Academic & Research Institutions

Others

Cheminformatics Market, By Region

North America

United States

Canada

Mexico

Europe

France

United Kingdom

Italy

Germany

Spain

Asia Pacific

China

India

Japan

Australia

South Korea

South America

Brazil

Argentina

Colombia

Middle East & Africa

South Africa

Saudi Arabia

UAE

## **Competitive Landscape**

Company Profiles: Detailed analysis of the major companies present in the Global Cheminformatics Market.

## **Available Customizations:**

Global Cheminformatics Market report with the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

## **Company Information**

Detailed analysis and profiling of additional market players (up to five).

## Contents

### 1. PRODUCT OVERVIEW

- 1.1. Market Definition
- 1.2. Scope of the Market
  - 1.2.1. Markets Covered
  - 1.2.2. Years Considered for Study
  - 1.2.3. Key Market Segmentations

### 2. RESEARCH METHODOLOGY

- 2.1. Objective of the Study
- 2.2. Baseline Methodology
- 2.3. Key Industry Partners
- 2.4. Major Association and Secondary Sources
- 2.5. Forecasting Methodology
- 2.6. Data Triangulation & Validation
- 2.7. Assumptions and Limitations

### 3. EXECUTIVE SUMMARY

- 3.1. Overview of the Market
- 3.2. Overview of Key Market Segmentations
- 3.3. Overview of Key Market Players
- 3.4. Overview of Key Regions/Countries
- 3.5. Overview of Market Drivers, Challenges, Trends

### 4. VOICE OF CUSTOMER

### 5. GLOBAL CHEMINFORMATICS MARKET OUTLOOK

- 5.1. Market Size & Forecast
  - 5.1.1. By Value
- 5.2. Market Share & Forecast
  - 5.2.1. By Application (Chemical Analysis, Drug Discovery and Validation, Virtual Screening, Others)
  - 5.2.2. By End User (Chemical & Pharmaceutical Companies, Academic & Research Institutions, Others)

- 5.2.3. By Region
- 5.2.4. By Company (2025)
- 5.3. Market Map

## **6. NORTH AMERICA CHEMINFORMATICS MARKET OUTLOOK**

- 6.1. Market Size & Forecast
  - 6.1.1. By Value
- 6.2. Market Share & Forecast
  - 6.2.1. By Application
  - 6.2.2. By End User
  - 6.2.3. By Country
- 6.3. North America: Country Analysis
  - 6.3.1. United States Cheminformatics Market Outlook
    - 6.3.1.1. Market Size & Forecast
      - 6.3.1.1.1. By Value
    - 6.3.1.2. Market Share & Forecast
      - 6.3.1.2.1. By Application
      - 6.3.1.2.2. By End User
  - 6.3.2. Canada Cheminformatics Market Outlook
    - 6.3.2.1. Market Size & Forecast
      - 6.3.2.1.1. By Value
    - 6.3.2.2. Market Share & Forecast
      - 6.3.2.2.1. By Application
      - 6.3.2.2.2. By End User
  - 6.3.3. Mexico Cheminformatics Market Outlook
    - 6.3.3.1. Market Size & Forecast
      - 6.3.3.1.1. By Value
    - 6.3.3.2. Market Share & Forecast
      - 6.3.3.2.1. By Application
      - 6.3.3.2.2. By End User

## **7. EUROPE CHEMINFORMATICS MARKET OUTLOOK**

- 7.1. Market Size & Forecast
  - 7.1.1. By Value
- 7.2. Market Share & Forecast
  - 7.2.1. By Application
  - 7.2.2. By End User

### 7.2.3. By Country

## 7.3. Europe: Country Analysis

### 7.3.1. Germany Cheminformatics Market Outlook

#### 7.3.1.1. Market Size & Forecast

##### 7.3.1.1.1. By Value

#### 7.3.1.2. Market Share & Forecast

##### 7.3.1.2.1. By Application

##### 7.3.1.2.2. By End User

### 7.3.2. France Cheminformatics Market Outlook

#### 7.3.2.1. Market Size & Forecast

##### 7.3.2.1.1. By Value

#### 7.3.2.2. Market Share & Forecast

##### 7.3.2.2.1. By Application

##### 7.3.2.2.2. By End User

### 7.3.3. United Kingdom Cheminformatics Market Outlook

#### 7.3.3.1. Market Size & Forecast

##### 7.3.3.1.1. By Value

#### 7.3.3.2. Market Share & Forecast

##### 7.3.3.2.1. By Application

##### 7.3.3.2.2. By End User

### 7.3.4. Italy Cheminformatics Market Outlook

#### 7.3.4.1. Market Size & Forecast

##### 7.3.4.1.1. By Value

#### 7.3.4.2. Market Share & Forecast

##### 7.3.4.2.1. By Application

##### 7.3.4.2.2. By End User

### 7.3.5. Spain Cheminformatics Market Outlook

#### 7.3.5.1. Market Size & Forecast

##### 7.3.5.1.1. By Value

#### 7.3.5.2. Market Share & Forecast

##### 7.3.5.2.1. By Application

##### 7.3.5.2.2. By End User

## 8. ASIA PACIFIC CHEMINFORMATICS MARKET OUTLOOK

### 8.1. Market Size & Forecast

#### 8.1.1. By Value

### 8.2. Market Share & Forecast

#### 8.2.1. By Application

- 8.2.2. By End User
- 8.2.3. By Country
- 8.3. Asia Pacific: Country Analysis
  - 8.3.1. China Cheminformatics Market Outlook
    - 8.3.1.1. Market Size & Forecast
      - 8.3.1.1.1. By Value
    - 8.3.1.2. Market Share & Forecast
      - 8.3.1.2.1. By Application
      - 8.3.1.2.2. By End User
  - 8.3.2. India Cheminformatics Market Outlook
    - 8.3.2.1. Market Size & Forecast
      - 8.3.2.1.1. By Value
    - 8.3.2.2. Market Share & Forecast
      - 8.3.2.2.1. By Application
      - 8.3.2.2.2. By End User
  - 8.3.3. Japan Cheminformatics Market Outlook
    - 8.3.3.1. Market Size & Forecast
      - 8.3.3.1.1. By Value
    - 8.3.3.2. Market Share & Forecast
      - 8.3.3.2.1. By Application
      - 8.3.3.2.2. By End User
  - 8.3.4. South Korea Cheminformatics Market Outlook
    - 8.3.4.1. Market Size & Forecast
      - 8.3.4.1.1. By Value
    - 8.3.4.2. Market Share & Forecast
      - 8.3.4.2.1. By Application
      - 8.3.4.2.2. By End User
  - 8.3.5. Australia Cheminformatics Market Outlook
    - 8.3.5.1. Market Size & Forecast
      - 8.3.5.1.1. By Value
    - 8.3.5.2. Market Share & Forecast
      - 8.3.5.2.1. By Application
      - 8.3.5.2.2. By End User

## **9. MIDDLE EAST & AFRICA CHEMINFORMATICS MARKET OUTLOOK**

- 9.1. Market Size & Forecast
  - 9.1.1. By Value
- 9.2. Market Share & Forecast

- 9.2.1. By Application
- 9.2.2. By End User
- 9.2.3. By Country
- 9.3. Middle East & Africa: Country Analysis
  - 9.3.1. Saudi Arabia Cheminformatics Market Outlook
    - 9.3.1.1. Market Size & Forecast
      - 9.3.1.1.1. By Value
    - 9.3.1.2. Market Share & Forecast
      - 9.3.1.2.1. By Application
      - 9.3.1.2.2. By End User
  - 9.3.2. UAE Cheminformatics Market Outlook
    - 9.3.2.1. Market Size & Forecast
      - 9.3.2.1.1. By Value
    - 9.3.2.2. Market Share & Forecast
      - 9.3.2.2.1. By Application
      - 9.3.2.2.2. By End User
  - 9.3.3. South Africa Cheminformatics Market Outlook
    - 9.3.3.1. Market Size & Forecast
      - 9.3.3.1.1. By Value
    - 9.3.3.2. Market Share & Forecast
      - 9.3.3.2.1. By Application
      - 9.3.3.2.2. By End User

## **10. SOUTH AMERICA CHEMINFORMATICS MARKET OUTLOOK**

- 10.1. Market Size & Forecast
  - 10.1.1. By Value
- 10.2. Market Share & Forecast
  - 10.2.1. By Application
  - 10.2.2. By End User
  - 10.2.3. By Country
- 10.3. South America: Country Analysis
  - 10.3.1. Brazil Cheminformatics Market Outlook
    - 10.3.1.1. Market Size & Forecast
      - 10.3.1.1.1. By Value
    - 10.3.1.2. Market Share & Forecast
      - 10.3.1.2.1. By Application
      - 10.3.1.2.2. By End User
  - 10.3.2. Colombia Cheminformatics Market Outlook

10.3.2.1. Market Size & Forecast

10.3.2.1.1. By Value

10.3.2.2. Market Share & Forecast

10.3.2.2.1. By Application

10.3.2.2.2. By End User

10.3.3. Argentina Cheminformatics Market Outlook

10.3.3.1. Market Size & Forecast

10.3.3.1.1. By Value

10.3.3.2. Market Share & Forecast

10.3.3.2.1. By Application

10.3.3.2.2. By End User

## **11. MARKET DYNAMICS**

11.1. Drivers

11.2. Challenges

## **12. MARKET TRENDS & DEVELOPMENTS**
