Abstracts

Asia Pacific Ethanol derivatives demand stood at 3.84 Million Tonnes in 2020 and is forecast to reach 6.54 Million Tonnes by 2030, growing at a healthy CAGR of 5.47% until 2030. The growth can be attributed to the rising use of Ethanol derivatives across various industries such as paints & coatings, personal care, and cosmetics. APAC is the global manufacturing hub for chemicals, owing to huge investments by key stakeholders across the pharmaceutical and petrochemical sector. China and India are contributing in huge volumes to cater to rising demand of the chemical. Growing disposable income, rising population, and increasing infrastructure are making the Asia Pacific the highest growing market of Ethanol Derivatives during the forecast period. Due to the rising cases of COVID-19 in the region, economies of India, China, South Korea were drastically affected. The increased number of patients suffering from coronavirus inclined the governments in the region to prolong the lockdown measures therefore, market growth was severely affected. However, APAC Ethanol derivative market is likely to continue with slower growth during the forecast period.
