Abstracts

Asia Pacific Ethylene Vinyl Acetate (EVA) demand stood at 2.76 Million Tonnes in 2020 and is forecast to reach 4.016 Million Tonnes by 2030, growing at a healthy CAGR of 4.13% until 2030. Demand for Ethylene Vinyl Acetate (EVA) is highest in the Asia Pacific as the region accounts for more than 60% of the global market share. The rising demand for Ethylene Vinyl Acetate (EVA) in the footwear industry and packaging industry is contributing to the significant market growth of EVA. Most of the European and American footwear companies rely on Asian countries for the manufacturing of their end-products, which further adds to the demand for EVA in the region. Besides, EVA copolymers find diverse applications in packaging, textile, bookbinding, bonding plastic films, metal surfaces, plasters, and cement renders. Thus, increasing commercial and urbanization activities in the Asia-Pacific region are adding to the growth of Ethylene Vinyl Acetate (EVA) during the forecast period. The COVID-19 pandemic disrupted the regional economy due to restricted mobility, temporary bans on the production of non-essential items, and reduced exports, which affected the demand for Ethylene Vinyl Acetate (EVA) significantly. However, with increasing industrialization and construction activities, the demand for the chemical is expected to bounce back in usual volumes.
