Abstracts

APAC Hydrogen Peroxide demand stood at 1.27 Million Tonnes in 2020 and is forecast to reach 1.92 Million Tonnes by 2030, growing at a healthy CAGR of 3.97% until 2030. Hydrogen Peroxide is an industrially manufactured chemical that is utilized as the key feedstock. Due to its eco-friendly nature and low manufacturing costs, Hydrogen Peroxide serves wide-ranging applications across a myriad of industries such as textile, water treatment, energy and chemicals, semiconductors, and others where the chemical is widely used for bleaching, sterilizing, cleaning, extraction, etc. The pulp and paper industry holds the largest share in the end-user segment of the APAC Hydrogen Peroxide market as the chemical is extensively used for improving brightness and stability. Companies are investing to expand their production capacities to increase their market shares and cater to the growing demand for industrial hydrogen peroxide, which is likely to drive the APAC Hydrogen Peroxide market. Recently, BASF SE, Solvay SA, and SK chemicals have collaborated to fund the establishment hydrogen peroxide-to-propylene oxide facility in South Korea.

The COVID-19 outbreak affected economies and industries in various countries due to repetitive government-imposed lockdowns, travel restrictions, supply chain breaks, and abrupt business shutdowns. But, the increasing use of hydrogen peroxide in pharmaceutical industries and healthcare facilities resulted in a spike in demand for the chemicals, which contributed to the APAC hydrogen peroxide market growth.
