Abstracts

Asia Pacific Iso Propyl demand stood at 1.03 Million Tonnes in 2020 and is forecast to reach 1.65 Million Tonnes by 2030, growing at a healthy CAGR of 5.09% until 2030. Increased consumption of isopropyl alcohol as a solvent across several end-user industries such as paints and coatings is likely to boost the growth of isopropyl alcohol in the Asia-Pacific region. Besides, increased use of the chemical in the pharmaceutical sector on account of surge in demand for disinfectants, hand sanitizers, surface cleaners, and other hygiene products is bolstering the growth of Iso Propyl Alcohol during the forecast period. APAC is the global manufacturing hub for IPA, owing to huge investments by the key stakeholders across the pharmaceutical and petrochemical hub. China and India are also contributing to the rising demand for isopropyl alcohol in massive volumes to cater to rising global IPA demand. During the COVID-19 pandemic, the demand for hygiene and personal care products increased exponentially, which expanded the adoption of isopropyl alcohol across pharmaceutical industries, which resulted in the positive growth of the Asia Pacific Iso Propyl Alcohol market.
