Abstracts

Australia database management systems market is projected to grow at a CAGR of over 11% during 2019-2024 on account of growing adoption of DBMS or database management system in small and large enterprises for managing large volume of data. Benefits of using DBMS such as data security, data sharing and minimize data integration are promoting the growth of database management systems market across the country.

Australia database management systems market can be segmented based on type, service, deployment type and end user. On the basis of type, the market can be bifurcated into relational and non-relational DBMS. Relational DBMS is expected to witness the fastest growth during the forecast period on account of benefits such as multi-user access, simplicity and easy maintenance. On the basis of service, the market can be segmented into maintenance and support, consulting and implementation. Implementation service type accounts for a major share in the market as majority of companies are implementing DBMS in order to manage a large chunk of data.

The major players operating in the Australia database management systems market

include Oracle, Microsoft, Amazon Web Services (Amazon), International Business Machines (IBM), SAP, Teradata, ADABAS, MySQL, FileMaker, Postgre, Tandem, etc. The market of DBMS is consolidated with few players occupying the major share. The companies operating in the market are developing advanced technologies and launching new products in order to stay competitive in the market. Other competitive strategies include mergers & acquisitions and new product developments.

Years considered for this report:

Historical Years: 2014-2017

Base Year: 2018

Estimated Year: 2019

Forecast Period: 2020–2024

Objective of the Study:

To analyze and forecast the market size of Australia database management systems market.

To classify and forecast Australia database management systems market based on type, service, deployment type, end user and regional distribution.

To identify drivers and challenges for Australia database management systems market.

To examine competitive developments such as expansions, new product launches, mergers & acquisitions, etc., in Australia database management systems market.

To conduct the pricing analysis for Australia database management systems market.

To identify and analyze the profile of leading players operating in the Australia database management systems market.

TechSci Research performed both primary as well as exhaustive secondary research for this study. Initially, TechSci Research sourced a list of manufacturers across the country. Subsequently, TechSci Research conducted primary research surveys with the identified companies. While interviewing, the respondents were also enquired about their competitors. Through this technique, TechSci Research could include the manufacturers which could not be identified due to the limitations of secondary research. TechSci Research analyzed the manufacturers, distribution channels and presence of all major service providers across the country.

TechSci Research calculated the market size of Australia Database management systems market by using a bottom-up approach, where data for various end-user segments was recorded and forecast for the future years. TechSci Research sourced these values from the industry experts and company representatives and externally validated through analyzing historical data of these product types and applications for getting an appropriate, overall market size. Various secondary sources such as company websites, news articles, press releases, company annual reports, investor presentations and financial reports were also studied by TechSci Research.

Key Target Audience:

Research organizations and consulting companies

Trade Associations, organizations, forums and alliances related to database management systems

Government bodies such as regulating authorities and policy makers

Industry associations

The study is useful in providing answers to several critical questions that are important for the industry stakeholders such as service providers and partners, end users, etc., besides allowing them in strategizing investments and capitalizing on market opportunities.

Report Scope:

In this report, Australia database management systems market has been segmented into following categories, in addition to the industry trends which have also been

detailed below:

Market, By Type:

Relational

Non-Relational

Market, By Service:

Implementation

Maintenance and Support

Consulting

Market, By Deployment Type:

On-premise

Cloud

Market, By End User:

BFSI

Telecommunications

Retail

Transportation & logistics

HR Management

Others

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in Australia database management systems market.

Available Customizations:

With the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

Detailed analysis and profiling of additional market players (up to five).

Contents

1. PRODUCT OVERVIEW

2. RESEARCH METHODOLOGY

3. EXECUTIVE SUMMARY

4. VOICE OF CUSTOMER

5. AUSTRALIA DATABASE MANAGEMENT SYSTEMS MARKET OUTLOOK

5.1. Market Size & Forecast

5.1.1. By Value

5.2. Market Share & Forecast

5.2.1. By Type (Relational, Non-Relational)

5.2.2. By Service (Maintenance and Support, Consulting, Implementation)

5.2.3. By Deployment type (Cloud and On-premise)

5.2.4. By End User (Retail, Transportation & Logistics, BFSI, HR Management, Telecommunications and Others)

5.2.5. By Company

5.3. Market Attractive Index

6. MARKET DYNAMICS

6.1. Drivers

6.2. Challenges

7. MARKET TRENDS & DEVELOPMENTS

8. COMPETITIVE LANDSCAPE

8.1. Oracle

8.2. Microsoft

8.3. Amazon Web Services

8.4. IBM

8.5. SAP

8.6. Teradata

8.7. ADABAS

8.8. MySQL

8.9. FileMaker

8.10. Postgre

9. STRATEGIC RECOMMENDATIONS

(Note: The companies list can be customized based on the client requirements.)
