## **Abstracts**

Australia POS market is anticipated to grow at a CAGR of more than 10% during 2020 - 2024 on account of technological advancements, affordable internet connectivity and increasing penetration of smartphones. Point of sale (POS) terminals are used for handling payments and checkouts. Modern POS terminals integrate multiple systems into a single terminal to manage operations such as printing, card payments, billing and cash collection. Moreover, need for user-friendly, secure and convenient payment options is further bolstering the growth of Australia POS terminal market. A large number of debit and credit card transactions is pushing the demand for POS terminals among retailers and other end-users across the country. Additionally, factors like low cost of the point of sale devices and easy deployment backed by the increasing inclination towards cashless economy are anticipated to positively influence Australia POS market through 2024.

Australia POS market can be segmented based on product type, deployment, industry and regional analysis. On the basis of product type, the market can be segmented into fixed and mPOS. Fixed POS device segment dominated the market in 2018 and the segment is poised to grow at an impressive rate during forecast period as well on account of early introduction in the market. Based on the deployment, the market can be bifurcated into cloud and on-premise, of which the former is anticipated to grow at a significant pace during the forecast period on account of multiple functionality and flexible pricing.
