Abstracts

Australia regenerative medicine market is anticipated to register growth with an impressive CAGR in the forecast period, 2023-2027, on the account of advancing medicines and growing expenses over advancement of the pharmaceutical products. Increasing evolution in pharmaceutical sector to design advanced drugs, and various other methods to better the existing treatment along with finding curative medicines for the unknown diseases, are anticipated to drive the growth of the Australia regenerative medicine market in the upcoming five years.

Regenerative medicines are a class of drugs that help in the process of replacing, engineering or regenerating human cells or animal cells. The drugs help in restoring the normal functioning of the cells. To restore the functions, regenerative medicines stimulate the body's own repair system to heal the irreparable tissues and organs. The regenerative medicine has potential that can be used for artificial generation of tissues and organs in laboratory that can later be implanted safely in case the body is unable to heal in certain conditions. Various biomedical techniques and clinical therapies are involved with regenerative medicine like cell therapy, immunomodulation therapy, and tissue engineering.

Bio-medical Advances Drive Market Growth

Regenerative medicines are advanced pharmaceuticals that undergo consistent research and product development such that better healthcare and patient care services are provided. Biomedical methods like cell therapy, immunomodulation therapy, and tissue engineering are increasing with the advancement in medicine and driving the growth of the Australia regenerative medicine market in the upcoming five years.

Moreover, increasing investment in these biomedical procedures and their research also aid the growth of the Australia regenerative medicine market in the next five years. Australian Government Department of Industry, Innovation and Science have funded Cooperative Research Center Program and amount of USD60 million through CTM CRC to develop integrated cost effective, and accessible cell therapies that have further revolutionized regenerative medicine.

Chronic Diseases Surges Demands For Regenerative Medicine

Increase in the instances of various neurological diseases and cancer, that are chronic and require advanced medicinal approach further support the growth of the Australia regenerative medicine market in the upcoming five years. Alzheimer's disease, Parkinson's disease, cardiovascular disorders (CVDs), osteoporosis and spinal cord injuries are being treated with regenerative medicine and thus supporting market growth.

Also, rising geriatric population in the country that is prone to diseases like musculoskeletal, oncological, dermatological and cardiological disorders are aiding the growth of the Australia regenerative medicine market in the next five years.

Market Segmentation

The Australia regenerative medicine market is segmented by type, application, end user, competitiveness landscape, and regional distribution. Based on type, the market is further differentiated into cell therapy, gene modification, tissue engineering, and others. On the basis of application, the market segment is bifurcated into bone graft substitutes, osteoarticular diseases, dermatology, cardiovascular diseases, and others. Market segments on the basis of end user, is further divided between academic and commercial end users. The market analysis also studies the regional segmentation to devise regional market segmentation, divided among Northern territory region, New South Wales region, Victoria region, Western Australia region, Queensland region, Tasmania region, and the South Australia region.

Company Profile

Cell Therapies Pty Ltd., Hudson Institute, Orthocell Ltd., Q-Gen Cell Therapeutics, Westmead Viral Vector Facility, Sydney Cell & Gene Therapies, Auspep Holdings Ltd., Luina Bio Pty Ltd., among others is a partial list of major market players of the companies responsible for the growth of Australia regenerative medicine market.

Report Scope:

In this report, Australia regenerative medicine market has been segmented into following categories, in addition to the industry trends which have also been detailed below:

Australia Regenerative Medicine Market, By Type:

Cell Therapy

Gene Modification

Tissue Engineering

Others

Australia Regenerative Medicine Market, By Application:

Bone Graft Substitutes

Osteoarticular Diseases

Dermatology

Cardiovascular Diseases

Others

Australia Regenerative Medicine Market, By End User:

Academic

Commercial

Australia Regenerative Medicine Market, By Region:

Northern Territory Region

New South Wales Region

Victoria Region

Western Australia Region

Queensland Region

Tasmania Region

South Australia Region

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in Australia regenerative medicine market.

Available Customizations:

With the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

Detailed analysis and profiling of additional market players (up to five).

Contents

1. PRODUCT OVERVIEW

2. RESEARCH METHODOLOGY

3. IMPACT OF COVID-19 ON AUSTRALIA REGENERATIVE MEDICINE MARKET

4. EXECUTIVE SUMMARY

5. VOICE OF CUSTOMER

6. AUSTRALIA REGENERATIVE MEDICINE MARKET OUTLOOK

6.1. Market Size & Forecast

6.1.1. By Value

6.2. Market Share & Forecast

6.2.1. By Type (Cell Therapy, Gene Modification, Tissue Engineering, Others)

6.2.2. By Application (Bone Graft Substitutes, Osteoarticular Diseases, Dermatology, Cardiovascular Diseases, Others)

6.2.3. By End User (Academic v/s Commercial)

6.2.4. By Region

6.2.5. By Company (2021)

6.3. Product Market Map

7. AUSTRALIA CELL THERAPY MARKET OUTLOOK

7.1. Market Size & Forecast

7.1.1. By Value

7.2. Market Share & Forecast

7.2.1. By Application

7.2.2. By End User

8. AUSTRALIA GENE MODIFICATION MARKET OUTLOOK

8.1. Market Size & Forecast

8.1.1. By Value

8.2. Market Share & Forecast

8.2.1. By Application

8.2.2. By End User

9. AUSTRALIA TISSUE ENGINEERING MARKET OUTLOOK

9.1. Market Size & Forecast

9.1.1. By Value

9.2. Market Share & Forecast

9.2.1. By Application

9.2.2. By End User

10. MARKET DYNAMICS

10.1. Drivers

10.2. Challenges

11. MARKET TRENDS & DEVELOPMENTS

12. POLICY & REGULATORY LANDSCAPE

13. AUSTRALIA ECONOMIC PROFILE

14. COMPETITIVE LANDSCAPE

14.1. Cell Therapies Pty Ltd.

14.2. Hudson Institute

14.3. Orthocell Ltd.

14.4. Q-Gen Cell Therapeutics

14.5. Westmead Viral Vector Facility

14.6. Sydney Cell & Gene Therapies

14.7. Auspep Holdings Ltd.

14.8. Luina Bio Pty Ltd.

15. STRATEGIC RECOMMENDATIONS

I would like to order

Product name: Australia Regenerative Medicine Market, By Type (Cell Therapy, Gene Modification, Tissue Engineering, Others), By Application (Bone Graft Substitutes, Osteoarticular Diseases, Dermatology, Cardiovascular Diseases, Others), By End User (Academic v/s Commercial), By Region, Competition Forecast & Opportunities, 2027

Product link: <https://marketpublishers.com/r/A66099AC8825EN.html>

Price: US\$ 4,400.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
