Abstracts

Australia skid steer loader market is anticipated to register growth with an impressive CAGR in the forecast period, 2024-2028, on the account of growing demands for residential and commercial infrastructure in the country. Increasing demands for the skid steer loader in the mining sector to load and lift heavy equipment and mining products is driving the growth of the Australia skid steer loader market in the upcoming five years. Expanding construction industry and growing investments by the government in infrastructure projects are also anticipated to support the growth of the Australia skid steer loader market in the future five years.

A skid steer loader is a small, rigid automobile that has large labor-intended arms attached to it. This engine powered automotive is capable of lifting heavy equipment, tools, and products and can be utilized for the purpose along with the transportation of the same. The four-wheeled automobile has the front and the back wheels connected mechanically which allows smoother facilitation along with the same speed movements. Where front and back wheels are linked together, the left and right sides function differently and can be used to drive the automobile as per requirements. The machine is utilized for various purposes like clearing snow, agricultural purposes, grapple bucket attachments, and also in the military.

Wide Range Applications Drive Market Growth

Demands for skid steer loaders in the country are highly influenced due to applications of the machinery in various end-use applications. The majority of the demand for the skid steer loader comes from the construction and mining industries. Mining is Australia's largest sector by share of national gross domestic product (GDP). It accounts for 10.4% of the GDP revenue as per the records in 2020. With increasing production of lithium, gold, iron ore, lead, zinc, and nickel, the industry would keep its expansion in the future years too, and thereby indirectly drive the growth of the Australia skid steer loader market in the future five years.

Also, the construction industry generates significant demand for skid steer loaders. The industry accounts for around 9% of Australia's gross domestic product. The increasing number of public infrastructure projects, along with growing demands of residential and commercial construction is further driving the growth of the Australia skid steer loader market in the upcoming five years. The rapidly growing population of the country, rising disposable income among the population, and government-funded infrastructure construction are also responsible for the futuristic growth of the Australia skid steer loader market in the forecast years.

Market Segmentation

The Australia skid steer loader market is segmented by lift, operating capacity, propulsion, end-use, competition landscape, and regional distribution. Based on the lift, the market is divided between radial and vertical lifts. By operating capacity, the market is further segmented into; up to 1550 lbs., 1550 lbs. – 2000 lbs., 2000 lbs. – 3000 lbs., 3000 – 4000 lbs., and more than 4000 lbs. Based on propulsion, the market is differentiated between ICE and electric. The end-use market segment is bifurcated into construction, mining, agriculture, industrial, municipal, and others. The market analysis also studies the regional segmentation to devise regional market segmentation, divided among Northern Territory, Queensland, New South Wales, Tasmania, Victoria, South Australia, and Western Australia.

Company Profile

Deere and Company, Caterpillar Inc., Komatsu Ltd., CNH Industrial America LLC, Ace Torwel Inc., Bobcat Company, CASE Construction Equipment, Liebherr Group, Volvo Construction Equipment AB, Xuzhou Construction Machinery Group Co., Ltd., among others a partial list of major market players of the companies responsible for the growth

of Australia skid steer loader market.

Report Scope:

In this report, Australia skid steer loader market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

Australia Skid Steer Loader Market, By Lift:

Radial

Vertical

Australia Skid Steer Loader Market, By Operating Capacity:

Up to 1550 lbs.

1550 lbs. – 2000 lbs.

2000 lbs. – 3000 lbs.

3000 – 4000 lbs.

More than 4000 lbs.

Australia Skid Steer Loader Market, By Propulsion:

ICE

Electric

Australia Skid Steer Loader Market, By End Use:

Construction

Mining

Agriculture

Industrial

Municipal

Others

Australia Skid Steer Loader Market, By Region:

Northern & Central

Western

Southern

Eastern

Competitive Landscape

Frequently Asked Question

Ques: What are the major drivers of the Australia Skid Steer Loader Market?

Ans: Surging demand for weight-lifting products and tools in infrastructure construction is driving the growth of the Australia skid steer loader market in the upcoming five years.

Ques: What strategic recommendations may the new market players follow in the future?

Ans: New market players may invest actively in research and innovative product development. Also, advancing their existent technology according to evolving consumer preferences along with mergers and acquisitions with the global giants can be viable strategic recommendations for future brand establishments.

Ques: Mention the names of the leading market players in Australia Skid Steer Loader Market.

Ans: Being responsible for the due growth of the market, some of the leading players of the Australia skid steer loader market were Deere and Company, Caterpillar Inc., Komatsu Ltd., CNH Industrial America LLC, Ace Torwel Inc., Bobcat Company, among others.

Ques: What is the study period for the Australia Skid Steer Loader Market?

Ans: Australia skid steer loader market was analyzed for the historical period of 2017 to 2020. While the base year was 2021, an estimation for the year 2022 was calculated and the market growth was further forecast for 2023 to 2027.
