Abstracts

Australia Water Pumps market is anticipated to witness a growth of steady CAGR in the forecast period, 2024-2028. This can be attribute to water pumps usage in agriculture, residential sector, mining and fires in the forest. A water pump is a machine used to move water through pipes. Water pumps are important tools for a variety of residential, commercial, or agricultural operations, and can play a particularly important role in rural areas or drain and fill swimming pools and dams or be used for agricultural irrigation. Increased reliance on groundwater and monsoon irregularities have increased the demand for water pumps in the agricultural sector. Government efforts to improve water infrastructure, water supply and sanitation across the country are expected to further boost the use of water pumps in the country. Demand for new high efficiency water pumps is expected to increase as aging pumps and water pumps are upgraded in industrial applications. Water pumps are used in a variety of situations, including firefighting, irrigation, garden water features, cars and boats, drainage, etc. Agriculture plays an important role in the extraction of water in the country as nearly 60% of its water is used for agriculture.

Myriota and Grundfos Australia partnership

South Australian pioneering satellite communication Myriota has joined forces with water pump producer Grundfos Australia to construct and promote the precise solar-

powered and satellite connected system that lets in farmers to remotely screen water pumps and water tanks. It is a well-timed product launch for the two companies, as 34,000 livestock farmers throughout the country battle with persistent labor shortages. The platform is designed to shop time, gas and labour wherein farm and station employees must often test water stages and pumps to make sure inventory have access to drink. The platform works via way of means of the use of Myriota's satellite-connected sensors which can be connected to Grundfos's European-synthetic solar-powered water pumps, so farmers can then use a cellular app to track water stages with 12 updates daily. The agency has a community of 20 small satellites orbiting the earth approximately 15 instances a day, with an official announcing this intended the maximum far off water pumps might have low-priced connectivity and monitoring.

Market Segmentation

Australia Water Pumps market can be segmented by type, application, region and competitive landscape. Based on type, the market is bifurcated into Centrifugal Water Pumps and Positive Displacement Water Pumps. Based on Application, the market is divided into Agriculture, Building Services, Power, Oil & Gas, Metal & Mining and Others.

Market Players

Weir Group (Australian Holdings) Pty Limited, Grundfos Pumps Pty. Ltd., Flowserve Australia Pty. Ltd., Davey Water Products Pty Ltd., KSB Australia Pty Ltd., NOV Australia Pty Ltd., Pentair Water Australia Pty. Ltd., Sulzer Pumps (Anz) Pty Ltd., U.C.P. Australia Pty. Ltd., ITT Blakers Pty Ltd. are some of the leading players operating in the Australia Water Pumps Market.

Report Scope:

In this report, the Australia Water Pumps market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

Australia Water Pumps Market, By Type:

Centrifugal Water Pumps

Positive Displacement Water Pumps

Australia Water Pumps Market, By Application:

Agriculture

Building Services

Power

Oil & Gas

Metal & Mining

Others

Australia Water Pumps Market, By Region:

New South Wales

Victoria

Queensland

Western Australia

South Australia

Tasmania

Northern Territory

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in the Australia Water Pumps Market.

Available Customizations:

With the given market data, TechSci Research offers customizations according to a
