Abstracts

Brazil Acetone market demand stood at 84.53 Thousand Tonnes in 2020 and is forecast to reach 128.88 Thousand Tonnes by 2030, growing at a healthy CAGR of 3.88% until 2030. Acetone is highly consumed as an ideal and cost-effective solvent in the adhesives, pharmaceuticals, and paints and coatings industry. In addition, large-scale investments for capacity additions of its popular derivatives like Bisphenol A, Methyl Methacrylate, and Iso Propyl Alcohol to serve their growing demand across the country is anticipated to provide appreciable growth prospects for Acetone demand in the forecast period.

Due to the onset of COVID-19, Brazil's acetone market growth faced a negative setback. Shutdown of many end-user industries along with manufacturing units affected the market growth adversely. Government authorities imposed lockdown and trade restrictions which further impeded the market growth in this period.
