Abstracts

Canada Iso Propyl Alcohol market demand stood at 54.04 Thousand Tonnes in 2020 and is forecast to reach 95.32 Thousand Tonnes by 2030, growing at a healthy CAGR of 5.73% until 2030 owing to the country's hefty investments across downstream cosmetic and pharmaceuticals sectors in the past few years. Isopropanol or Iso Propyl Alcohol (IPA) is commonly known as rubbing alcohol and is known for its applications across several consumer and industrial products. The country's strengthening upstream supply chains would stimulate market growth in the forecast period. With the recent COVID-19 outbreak, the most in-demand was hand sanitizers which use isopropyl alcohol as the main ingredient. The ability to protect the hands from getting affected by the virus contributed to an increase in the demand for the market in this period.
