## **Abstracts**

China Bisphenol S demand stood at 40.32 Thousand Tonnes in 2020 and is forecast to reach 144.72 Thousand Tonnes by 2030, growing at a healthy CAGR of 12.81% until 2030. The growth can be attributed to the rising demand for thermal papers, which are used in online billing POS machines as well as the rising need for packaging in the food and beverages sector. China is one of the dominating epoxy resin producers in the world, thereby generating significant demand for bisphenol S across the region. Besides, the growing use of Bisphenol S derivatives such as phenolic resins and polyurethanes across the various end-user industries is stimulating its market growth across the country. Moreover, the country is one of the leading Bisphenol S producers across the globe, owing to the presence of a large number of market players with high production capacities. Jiangsu Aolunda High-tech Industry Co Ltd, Nantong Volant-chem corp., etc., are some of the major Chinese producers involved in Bisphenol S production. However, disruption in China caused by the COVID-19 pandemic has hit the domestic chemical production in the first half of 2020 due to restrictions on the movement of goods and people. However, demand started to stabilize in the second half and is expected to further grow during the forecast period.

Under this subscription, you would be able to access the China Bisphenol S market demand and supply analysis on a cloud-based platform for one year.
