## **Abstracts**

China mask market is estimated to reach \$ 3.6 billion in 2020 and is expected to remain high over the next five years due to rising health concerns, growing pollution levels and increasing regulations to wear masks in hospitals and clinics as well as some of the industrial sectors, like construction, mining, transportation, etc. Use of masks has especially surged on account of spread of COVID-19 pandemic in the beginning of the year 2020.

China mask market is segmented based on product, type, filter, particulate matter, standard ratings, usage, distribution channel and region. Based on product, the market is segmented into reusable and disposable masks. Reusable masks led the China mask market as they can be used more than once and are therefore preferred by the users.

Based on standard rating, the market is segmented into N95, N99, N100, P95, P100

and others. Among all these ratings, N95 segment is estimated to account for the largest share of the China mask market. The reason behind this is N95 masks offer 50% lesser breathing endurance than others, which means people can wear them for longer durations without feeling suffocated.

Major players operating in China mask market are 3M, Green Shield, Honeywell, Uvex, Dongguan Rongxin, Tianjin TEDA, Shanghai Meike, Asami, Kowa, Shen Huang, and others. Leading companies are launching new products in order to stay competitive in the market.
