Abstracts

Egypt Glucometers Market is expected to grow at an impressive rate during the forecast period, 2018-2028. The major factors contributing to the growth of the market include increasing prevalence of diabetes, growing awareness of diabetes management, government initiatives, technological advancements, and increasing healthcare expenditure.

The rising incidence of diabetes is the primary driver of the glucometer market in Egypt. Diabetes is a chronic disease that requires ongoing management, including monitoring blood glucose levels regularly. The growing number of people living with diabetes in Egypt has led to an increased demand for glucometers and other diabetes management tools.

People are becoming more proactive in managing their health and are looking for ways to monitor their blood glucose levels and manage their diabetes effectively.

The Egyptian government has taken several initiatives to address the rising prevalence

of diabetes. These initiatives include launching awareness campaigns to educate people about the importance of diabetes management and providing subsidies for medical devices like glucometers. The government's efforts to promote diabetes management have helped to increase the availability and affordability of glucometers in Egypt.

The development of more advanced and user-friendly glucometers has also contributed to the growth of the market in Egypt. These devices are more accurate, require less blood, and offer other features like data tracking and analysis. The availability of these advanced devices has made it easier for people to monitor their blood glucose levels and manage their diabetes effectively.

As healthcare expenditure in Egypt continues to rise, more people are able to afford glucometers and other diabetes management tools. This trend is likely to continue in the coming years, which could contribute to the growth of the glucometer market. In addition, as more people gain access to healthcare services, the demand for diabetes management tools is likely to increase.

Advancements in technology are likely to have a significant impact on the growth of the glucometer market in Egypt. The development of more advanced and user-friendly glucometers, such as those with Bluetooth connectivity and automatic data syncing with smartphones, is making it easier for people with diabetes to manage their condition. In addition, the development of continuous glucose monitoring systems (CGMs) that provide real-time glucose data could also contribute to the growth of the market in Egypt.

Telemedicine is also becoming more prevalent in Egypt, especially considering the COVID-19 pandemic. This trend is likely to continue in the coming years, and it could have a significant impact on the growth of the glucometer market. Telemedicine platforms that integrate with glucometers could enable people with diabetes to monitor their condition remotely and receive real-time guidance and support from healthcare professionals.

Increasing focus on preventive healthcare is becoming a more prominent focus in Egypt, and this could have a significant impact on the growth of the glucometer market. Preventive healthcare initiatives that encourage people to monitor their health and take action before they develop a chronic condition like diabetes could increase the demand for glucometers and other health monitoring devices.

While the market for glucometers in Egypt is growing rapidly, there are several challenges that could impede the growth of this market. These challenges include the high cost of glucometers, limited awareness and education, lack of healthcare infrastructure, limited availability of advanced devices and cultural barriers.

Growing Prevalence of Diabetes

The growing prevalence of diabetes in Egypt is having a significant impact on the growth of the glucometer market in the country. The International Diabetes Federation (IDF) estimates that 15.2% of Egyptian people have diabetes, although this number may be underestimated. Diabetes is a chronic disease that affects the body's ability to regulate blood glucose levels. As the number of people with diabetes in Egypt continues to grow, there is an increasing demand for diabetes management tools like glucometers. A glucometer is a device that measures a person's blood glucose levels, and it is an essential tool for people with diabetes to monitor their condition and make informed decisions about their diet and medication. Glucometer manufacturers and distributors in Egypt are seeing a rise in demand for their products, and they are investing in research and development to create more advanced and user-friendly devices.

The Egyptian government has taken several initiatives to promote diabetes management. These initiatives include launching awareness campaigns to educate people about the importance of diabetes management and providing subsidies for medical devices like glucometers.

The increasing prevalence of diabetes in Egypt is not only driving the demand for glucometers but also creating opportunities for innovation and growth in the healthcare sector. The development of new and more advanced diabetes management tools like continuous glucose monitoring systems (CGMs) and the integration of telemedicine platforms with glucometers is making it easier for people with diabetes to manage their condition, and it is also contributing to the growth of the glucometer market in Egypt. The growing prevalence of diabetes in Egypt is a significant driver of the growth of the glucometer market in Egypt.

Technological Advancements

Technological advancements in glucometers are having a significant impact on the growth of the glucometer market in Egypt. Over the past few years, there has been a rapid development in the technology used in glucometers, with more advanced and user-

friendly devices being introduced in the market. These advancements are driving the demand for glucometers in Egypt, and this trend is expected to continue in the coming years.

The major significant technological advancements in the field of glucometers are the development of continuous glucose monitoring systems (CGMs). CGMs are small, wearable devices that continuously monitor a person's blood glucose levels in real-time. These devices provide people with diabetes with a more accurate and detailed view of their glucose levels, allowing them to make better-informed decisions about their diet, exercise, and medication. CGMs are becoming increasingly popular in Egypt, and the market for these devices is expected to grow significantly in the coming years. This growth is being driven by several factors, including the increasing prevalence of diabetes in Egypt and the growing demand for more advanced diabetes management tools.

The integration of telemedicine platforms with glucometers is also a technological advancement which is influencing the growth of the market. This integration allows people with diabetes to share their glucose data with healthcare professionals remotely, allowing for better diabetes management and more personalized treatment plans. This integration is becoming more prevalent in Egypt, and it is expected to drive the growth of the glucometer market in the country in the coming years.

Additionally, there is also a growing trend towards more user-friendly and intuitive glucometers in Egypt. Manufacturers are investing in research and development to create devices that are easier to use and require less blood for testing. These advancements are making it easier for people with diabetes to manage their condition and are driving the demand for glucometers in Egypt.

Growing Awareness of Diabetes Management

Growing awareness of diabetes management in Egypt is having a significant impact on the growth of the glucometer market in the country. With a high prevalence of diabetes in Egypt, there is a growing need for diabetes management tools like glucometers. As awareness of diabetes management grows, more people are realizing the importance of monitoring their blood glucose levels and are seeking out glucometers as a means of doing so.

This growing awareness is driving the demand for glucometers in Egypt and is expected to continue to do so in the coming years. As more people become aware of the

importance of monitoring their blood glucose levels, the demand for glucometers is likely to increase.

Market Segmentation

The Egypt Glucometers Market can be segmented by product type, technique, type, distribution channel, end user, region and competitive landscape. By product type, the market can be segmented into Self Glucose Monitoring Glucometers and Continuous Glucose Monitoring Glucometers. Based on technique, the market can be segmented into Invasive and Non-Invasive. In terms of type, the market can be segmented into Wearable and Non-Wearable. Based on distribution channel, the market is divided into Hospital Pharmacies, Retail Outlet, Online and Others. Based on end user, the market is divided into Hospitals & Clinics, Diagnostic Centers, Home Care and Others.

Market Players

Abbott laboratories Egypt, Bayer Egypt, Arkray Egypt, Novo Nordisk A/S, Johnson & Johnson, F. Hoffmann-La Roche AG, and Lifescan among others are some of the leading companies operating in the market.

Report Scope:

In this report, Egypt Glucometers Market has been segmented into following categories, in addition to the industry trends which have also been detailed below:

Egypt Glucometers Market, By Product Type

Self Glucose Monitoring Glucometers

Continuous Glucose Monitoring Glucometers

Egypt Glucometers Market, By Technique

Invasive

Non-Invasive

Egypt Glucometers Market, By Type

Wearable

Non-Wearable

Egypt Glucometers Market, By Distribution Channel

Hospital Pharmacies

Retail Outlet

Online

Others

Egypt Glucometers Market, By End User

Hospitals & Clinics

Diagnostic Centers

Home Care

Others

Egypt Cardiovascular Devices Market, By Region

Cairo

Qalyubia

Alexandria

Port Said

Giza

Suez

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in Egypt
Glucometers Market

Available Customizations:

With the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Detailed analysis and profiling of additional market players (up to five).

Contents

1. PRODUCT OVERVIEW

- 1.1. Market Definition
- 1.2. Scope of the Market
 - 1.2.1. Markets Covered
 - 1.2.2. Years Considered for Study
 - 1.2.3. Key Market Segmentations

2. RESEARCH METHODOLOGY

- 2.1. Objective of the Study
- 2.2. Baseline Methodology
- 2.3. Key Industry Partners
- 2.4. Major Association and Secondary Sources
- 2.5. Forecasting Methodology
- 2.6. Data Triangulation & Validation
- 2.7. Assumptions and Limitations

3. EXECUTIVE SUMMARY

- 3.1. Overview of the Market
- 3.2. Overview of Key Market Segmentations
- 3.3. Overview of Key Market Players
- 3.4. Overview of Key Regions/Countries
- 3.5. Overview of Market Drivers, Challenges, Trends

4. VOICE OF CUSTOMER

5. EGYPT GLUCOMETERS OUTLOOK

- 5.1. Market Size & Forecast
 - 5.1.1. By Value & Volume
- 5.2. Market Share & Forecast
 - 5.2.1. By Product Type (Self Glucose Monitoring Glucometers v/s Continuous Glucose Monitoring Glucometers)
 - 5.2.2. By Technique (Invasive v/s Non-Invasive)

- 5.2.3. By Type (Wearable v/s Non-Wearable)
- 5.2.4. By Distribution Channel (Hospital Pharmacies, Retail Outlet, Online, Others)
- 5.2.5. By End User (Hospitals & Clinics, Diagnostic Centers, Home Care, Others)
- 5.2.6. By Region
- 5.2.7. By Company (2022)

5.3. Market Map

- 5.3.1. By Product Type
- 5.3.2. By Technique
- 5.3.3. By Type
- 5.3.4. By Distribution Channel
- 5.3.5. By End User
- 5.3.6. Region

6. EGYPT SELF GLUCOSE MONITORING GLUCOMETERS MARKET OUTLOOK

6.1. Market Size & Forecast

- 6.1.1. By Value

6.2. Market Share & Forecast

- 6.2.1. By Technique
- 6.2.2. By Type
- 6.2.3. By Distribution Channel
- 6.2.4. By End User

7. EGYPT CONTINUOUS GLUCOSE MONITORING GLUCOMETERS MARKET OUTLOOK

7.1. Market Size & Forecast

- 7.1.1. By Value

7.2. Market Share & Forecast

- 7.2.1. By Technique
- 7.2.2. By Type
- 7.2.3. By Distribution Channel
- 7.2.4. By End User

8. MARKET DYNAMICS

8.1. Drivers

8.2. Challenges

9. MARKET TRENDS & DEVELOPMENTS

- 9.1. Recent Developments
- 9.2. Merger & Acquisition
- 9.3. Product Launches

10. POLICY & REGULATORY LANDSCAPE

11. EGYPT ECONOMIC PROFILE

12. EGYPT GLUCOMETERS MARKET: SWOT ANALYSIS

13. COMPETITIVE LANDSCAPE

- 13.1. Business Overview
- 13.2. Product Offerings
- 13.3. Recent Developments
- 13.4. Financials (As Reported)
- 13.5. Key Personnel
- 13.6. SWOT Analysis
 - 13.6.1. Abbott laboratories Egypt
 - 13.6.2. Bayer Egypt
 - 13.6.3. Arkray Egypt
 - 13.6.4. Novo Nordisk A/S
 - 13.6.5. Johnson & Johnson
 - 13.6.6. F. Hoffmann-La Roche AG
 - 13.6.7. Lifescan

14. STRATEGIC RECOMMENDATIONS

15. ABOUT US & DISCLAIMER

I would like to order

Product name: Egypt Glucometers Market, By Product Type (Self Glucose Monitoring Glucometers v/s Continuous Glucose Monitoring Glucometers), By Technique (Invasive v/s Non-Invasive), By Type (Wearable v/s Non-Wearable), By Distribution Channel (Hospital Pharmacies, Retail Outlet, Online, Others), By End User (Hospitals & Clinics, Diagnostic Centers, Home Care, Others), By Region, Competition Forecast & Opportunities, 2028
