Abstracts

Egypt Gynecology Drugs Market is expected to grow at a significant rate during the forecast period. Egypt has a growing pharmaceutical industry and is one of the largest markets for pharmaceuticals in the Middle East and North Africa (MENA) region. The gynecology drugs market in the country is expected to continue to grow due to the increasing prevalence of gynecological diseases and disorders, a growing female population, and rising awareness and education among women about their health and well-being.

The market for gynecology drugs in Egypt is regulated by the Ministry of Health and Population, which is responsible for overseeing the approval and registration of new drugs and ensuring the safety and quality of pharmaceutical products. The government of Egypt also provides subsidies for some essential drugs, including those used in the treatment of gynecological conditions. These factors are fueling the demand for the gynecology drugs market in Egypt.

Some of the leading companies operating in the Egypt gynecology drugs market are

Pfizer, Bayer, MSD, Novartis, and Sanofi. These companies offer a range of products for the treatment of various gynecological diseases and conditions, such as hormonal disorders, infections, and even cancer.

Overall, the gynecology drugs market in Egypt is expected to remain proliferating in the coming years due to increasing demand for these drugs and the rising government support for the pharmaceutical industry. However, it is important to note that market conditions can change rapidly, and the information provided here may not reflect the current situation.

Prevalence of Gynecological Diseases and Disorders Drives Market

The increasing prevalence of gynecological diseases and disorders among the female population is the key driving force behind the growth of the Egypt gynecology drugs market. The rising incidence of these disorders is leading to a higher demand for gynecology drugs and treatments. For instance, cervical cancer has surfaced as one of the most common types of cancer affecting women in Egypt. According to the World Health Organization (WHO), Cervical cancer is the 6th most common cancer in women in the Eastern Mediterranean Region. In 2020, an estimated 89,800 women were diagnosed with cervical cancer in the Region, and more than 47,500 women died from the disease. Moreover, according to the latest WHO data published in 2020, the deaths caused by ovarian cancer reached 1,944 or 0.36% of total deaths in Egypt. The age-adjusted death rate is 5.11 per 100,000 population, placing Egypt at 61st position in the world. This has led to an increased demand for drugs and treatments to prevent and treat cervical cancer. Other gynecological conditions, such as breast cancer, ovarian cancer, endometriosis, and uterine fibroids, are also becoming more prevalent in the country, fueling the demand for drugs and treatments to manage and treat these conditions.

As a result, pharmaceutical companies are investing in research and development to prepare new and more effective drugs and treatments for gynecological conditions. This factor is likely to propel the gynecology drugs market in Egypt in the coming years.

Growing Female Population Boosts Demand for Egypt Gynecology Drugs market

The growing female population in Egypt is another important driver in the country's gynecology drugs market. As the female population grows, so does the demand for gynecology drugs and treatments. According to the World Bank, the female population in Egypt was estimated to be around 53,107.73 billion in 2020, accounting for around

49.4% of the total population. This is a significant market for gynecology drugs and treatments, as women require healthcare services throughout their lives, including contraception, prenatal care, and treatment for gynecological conditions. Furthermore, as women in this country become more aware of their health and well-being, they are increasingly seeking out healthcare services and products, including gynecology drugs and treatments. This is leading to a higher demand for these products and driving the gynecology drugs market.

Over the coming years, the growing female population in Egypt is expected to continue to boost the demand for gynecology drugs and treatments, making it an important driver of market expansion.

Rising Disposable Income Fuel Egypt Gynecology Drugs Market Expansion

The rising disposable income is another factor contributing to the growth of the gynecology drugs market in Egypt. With increasing disposable income, people here can afford better healthcare services, including gynecology drugs and treatments. As the economy grows, people are experiencing increased purchasing power and higher standards of living, which is leading to increased spending on healthcare. This is particularly true for women, who often prioritize their health and well-being, including gynecological health. With increased disposable income, women in Egypt can afford a wider range of gynecology drugs and treatments, including more expensive and advanced options. This is driving demand for these products and contributing to the growth of the Egypt gynecology drugs market.

In addition, as the healthcare system in Egypt improves and becomes more accessible, people are increasingly seeking out healthcare services and products, including gynecology drugs and treatments. This is further fueling demand for these products and driving the expansion of the gynecology drugs market in Egypt. Overall, the rising disposable income is expected to continue to drive demand for gynecology drugs and treatments in Egypt during the forecast period, making it an important factor in the market expansion.

Technological Advancements in Gynecology Drugs Market

Technological advancements are also a significant driver of the gynecology drugs market in Egypt. Technological advancements are leading to the development of new and more effective gynecology drugs and treatments, boosting their demand in the market. For example, there have been significant developments in the use of hormonal

therapies for the treatment of gynecological conditions, such as endometriosis and uterine fibroids. These therapies are highly effective in reducing symptoms and improving the quality of life for women with these conditions. In addition, there has been an increasing focus on personalized medicine and precision medicine approaches, which aim to provide targeted and individualized treatments based on a patient's specific needs and characteristics. This has led to the development of new drugs and treatments that are tailored to the unique needs of individual patients. Furthermore, advancements in diagnostic technologies, such as imaging and genetic testing, are improving the ability to detect and diagnose gynecological conditions at an early stage. This allows for earlier intervention and more effective treatment, which can improve patient outcomes.

Overall, technological advancements are facilitating the development of new and more effective gynecology drugs and treatments to meet the needs of patients in Egypt. However, the regulatory environment for pharmaceuticals in the country can be complex and challenging to navigate. The regulatory process for drug approvals is time-consuming and expensive, which can impact the ability of pharmaceutical companies to bring new drugs to market. Hence, this factor is expected to hamper the growth of this market.

Market Segmentation

The Egypt gynecology drugs market is analyzed on the basis of therapeutics, indication, and distribution channels. Based on therapeutics, the market is divided into non-hormonal therapy vs. hormonal therapy. Based on indication, the market is divided into contraception, gynecology infections, female infertility, postmenopausal disorders, polycystic ovary syndrome, osteoporosis, gynecology cancer, endometriosis, and others. Based on distribution channels, the market is divided into retail pharmacies, hospital pharmacies, and online pharmacies.

Market players

Amgen Inc., F. Hoffmann - La Roche Ltd., Roche Egypt LLC, Novartis Egypt, Bayer AG, Merck & Co., Inc., Eli Lilly and Company, Pfizer Inc., Abbott Laboratories, AbbVie Inc., GlaxoSmithKline Plc, AstraZeneca Plc, Johnson and Johnson, Sanofi Egypt, Ferring Pharmaceuticals are some of the key players in the Egypt gynecology drugs market.

Report Scope:

In this report, the Egypt gynecology drugs market has been segmented into the following categories, in addition to the industry trends, which have also been detailed below:

Egypt Gynecology Drugs Market, By Therapeutics:

Non-Hormonal Therapy

Hormonal Therapy

Egypt Gynecology Drugs Market, By Indication:

Contraception

Gynecology Infections

Female Infertility

Postmenopausal disorders

Polycystic Ovary Syndrome

Gynecology Cancers

Endometriosis

Egypt Gynecology Drugs Market, By Distribution Channel:

Retail Pharmacies

Hospital Pharmacies

Online Pharmacies

Egypt Gynecology Drugs market, By Region:

Cairo

Alexandria

Giza Qalyubia

Port Said Suez

Rest of Egypt

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in the Egypt Gynecology Drugs market.

Available Customizations:

With the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

Detailed analysis and profiling of additional market players (up to five).

Contents

1. PRODUCT OVERVIEW

- 1.1. Market Definition
- 1.2. Scope of the Market
 - 1.2.1. Markets Covered
 - 1.2.2. Years Considered for Study
 - 1.2.3. Key Market Segmentations

2. RESEARCH METHODOLOGY

- 2.1. Objective of the Study
- 2.2. Baseline Methodology
- 2.3. Key Industry Partners
- 2.4. Major Association and Secondary Sources
- 2.5. Forecasting Methodology
- 2.6. Data Triangulation & Validation
- 2.7. Assumptions and Limitations

3. EXECUTIVE SUMMARY

- 3.1. Overview of the Market
- 3.2. Overview of Key Market Segmentations
- 3.3. Overview of Key Market Players
- 3.4. Overview of Key Regions/Countries
- 3.5. Overview of Market Drivers, Challenges, and Trends

4. VOICE OF CUSTOMERS

5. EGYPT GYNECOLOGY DRUGS MARKET OUTLOOK

- 5.1. Market Size & Forecast
 - 5.1.1. By Value & Volume
- 5.2. Market Share & Forecast
 - 5.2.1. By Therapeutics (Non-Hormonal Therapy, Hormonal Therapy)
 - 5.2.2. By Indication (Contraception, Gynecological infections, Female Infertility, Postmenopausal Disorders, Polycystic Ovary Syndrome, Gynecological Cancer, Endometriosis)

5.2.3. By Distribution Channel (Retail Pharmacies, Hospital Pharmacies, Online Pharmacies)

5.2.4. By Region

5.2.5. By Company (2022)

5.3. Market Map

6. EGYPT NON-HORMONAL THERAPY MARKET OUTLOOK

6.1. Market Size & Forecast

6.1.1. By Value & Volume

6.2. Market Share & Forecast

6.2.1. By Therapeutics

6.2.2. By Indication

6.2.3. By Distribution Channel

7. EGYPT HORMONAL THERAPY MARKET OUTLOOK

7.1. Market Size & Forecast

7.1.1. By Value & Volume

7.2. Market Share & Forecast

7.2.1. By Therapeutics

7.2.2. By Indication

7.2.3. By Distribution Channel

8. MARKET DYNAMICS

8.1. Drivers

8.2. Challenges

9. MARKET TRENDS & DEVELOPMENTS

10. POLICY & REGULATORY LANDSCAPE

11. EGYPT ECONOMIC PROFILE

12. COMPETITIVE LANDSCAPE

12.1. Amgen Inc.

12.2. F. Hoffmann - La Roche Ltd. Roche Egypt LLC

- 12.3. Novartis Egypt
- 12.4. Bayer AG
- 12.5. Merck & Co., Inc.
- 12.6. Eli Lilly and Company
- 12.7. Pfizer Inc.
- 12.8. Abbott Laboratories
- 12.9. AbbVie Inc.
- 12.10. GlaxoSmithKline Plc
- 12.11. AstraZeneca Plc
- 12.12. Johnson and Johnson
- 12.13. Sanofi Egypt
- 12.14. Ferring Pharmaceuticals

13. STRATEGIC RECOMMENDATIONS

I would like to order

Product name: Egypt Gynecology Drugs Market By Therapeutics (Non-Hormonal Therapy, Hormonal Therapy), By Indication (Contraception, Gynecological Infections, Female Infertility, Postmenopausal disorders, Polycystic Ovary Syndrome, Osteoporosis, Gynecological Cancer, Endometriosis, Others), By Distribution Channel (Retail Pharmacies, Hospital Pharmacies, Online Pharmacies), By Region, Competition, Forecast, and Opportunities, 2028
