Abstracts

Egypt textile auxiliaries market is anticipated to grow significantly by 2028, driven by several factors, including the growth of the textile industry, favorable government initiatives, the increasing demand for eco-friendly products, technological advancements, and the increasing use of synthetic fibers.

Textile auxiliaries are chemicals that are used in various stages of textile processing, such as dyeing, printing, finishing, and washing. They enhance the properties and performance of textiles, such as color fastness, softness, durability, and appearance. Some of the major textile auxiliaries used in Egypt are wetting agents, dispersing agents, leveling agents, fixing agents, softeners, and optical brighteners.

The textile industry in Egypt is growing due to the increasing population, rising per capita income, and changing consumer preferences, where textile auxiliaries are abundantly used and propelled the market growth. The Egyptian government is taking initiatives to encourage investment in the textile industry, which is expected to increase the demand for textile auxiliaries in the country. The demand for eco-friendly textile products is also increasing in Egypt, which is driving the development of eco-friendly textile auxiliaries. The adoption of new technologies in the textile industry is expected to increase the demand for textile auxiliaries. The increasing use of synthetic fibers, which require different types of textile auxiliaries, is also driving the growth of the market. Therefore, the Egypt textile auxiliaries market is expected to continue growing in the anticipated period.

The Rising Textile Industry is a Factor driving the Egypt Textile Auxiliaries Market Growth

The growing textile industry in Egypt has a significant impact on the growth of the textile auxiliary market in the country. As the textile industry grows, the demand for textile auxiliaries also increases as they are essential components of textile production processes. Textile auxiliaries are used to enhance the properties of fabrics, such as softness, durability, color retention, and water resistance. They are also used for the treatment of textiles during production processes, including bleaching, dyeing, and printing.

The growth of the textile industry in Egypt is being driven by several factors, including the increasing population, rising per capita income, and changing consumer preferences. As the population grows and incomes rise, there is a higher demand for textiles, including clothing, home textiles, and industrial textiles. Consumer preferences are also evolving, with consumers seeking more sustainable and eco-friendly textile products in textile auxiliaries helping them achieve that goal.

The 3.4% of Egypt's economy is supported by the textile industry and braced by the government, which is taking initiatives to encourage investment in the sector. For example, the government has established the Textile City in Alexandria, which is a free zone that provides investors with incentives such as tax exemptions, reduced customs duties, and simplified procedures for obtaining licenses and permits. This has led to increased investment in the textile industry, which automatically propels the demand of textile auxiliaries in Egypt.

The growth of the industry in Egypt has also led to an increase in the demand for eco-friendly textile products, which has driven the development of eco-friendly textile auxiliaries. This trend is expected to continue, with consumers becoming more conscious of the environmental impact of textile production. Therefore, the growing population and urbanization in Egypt are driving the demand for textiles in Egypt, which in turn is driving the demand for Egypt textile auxiliaries market.

Growing Demand for Eco-Friendly Products are Key Factor Driving the Market Growth

The textile industry in Egypt is one of the major industries of Egypt, accounting for around 34% of the country's industrial output. With the rise in population and incomes, the demand for textiles has been progressively increasing. However, with the growth of the industry, there has also been a growing concern over the environmental impact of

textile production processes.

Due to adverse effects on humans, there has been a significant shift towards sustainability in the textile industry. Consumers are increasingly aware of the harmful effects of chemical waste on the ecosystem and are demanding textile products that are produced using eco-friendly processes and materials. This trend toward sustainability has had a significant impact on the Egyptian textile auxiliary market.

The demand for eco-friendly products has led to the development of new types of textile auxiliaries that are biodegradable, non-toxic, and have a minimal environmental impact. These eco-friendly auxiliaries are used to replace traditional auxiliaries that are known to be harmful to the environment and can cause pollution and other negative environmental impacts.

The Egyptian textile auxiliary market has been quick to adopt eco-friendly solutions. There has been a surge in the production and use of eco-friendly auxiliaries, such as natural dyes, enzymes, and biopolymers. These products are designed to have a minimal impact on the environment while providing the same benefits as traditional auxiliaries.

The trend towards eco-friendliness is not just a consumer-driven phenomenon. The Egyptian government has now recognized the importance of sustainability and has been taking steps to promote eco-friendly products. The government has launched initiatives to encourage the development of sustainable textile production processes and has incentivized the production and use of eco-friendly auxiliaries.

The demand for eco-friendly textile products has also led to an increase in research and development (R&D) efforts focused on creating new types of eco-friendly textile auxiliaries. With advancements in technology, it is expected that more sustainable and eco-friendly textile auxiliaries will be developed, further driving the growth of the Egyptian textile auxiliary market. Therefore, favorable government initiatives and efforts by market players to promote sustainable development can have a significant impact on the textile auxiliaries market in Egypt.

Increasing Use of Auxiliaries in Synthetic Fibers are Key Reason Responsible for Market Growth

Synthetic fibers have become increasingly popular in the textile industry in recent years due to their affordability, durability, and versatility. The use of synthetic fibers has had a

significant impact on the Egyptian textile auxiliary market, as the demand for these fibers has led to a shift in the types of auxiliary chemicals used in textile production.

Traditionally, natural fibers such as cotton and wool were the primary materials used in textile production. However, with the increasing demand for synthetic fibers such as polyester, nylon, and acrylic, the market for textile auxiliaries has also shifted to accommodate the different needs of these fibers.

Synthetic fibers are produced using petroleum-based chemicals, which require specific auxiliary chemicals for dyeing, printing, and finishing. This has led to the development of new types of textile auxiliaries that are designed to work with synthetic fibers. For example, synthetic fibers are generally more resistant to water, so special chemicals are needed to make them more absorbent for dyeing and finishing. Apart from these, the use of synthetic fibers has also led to an increased demand for chemicals that can improve their performance and durability. For example, flame retardants are often used in the production of synthetic fibers to make them more resistant to fire.

The Egyptian textile auxiliaries market has responded to the increasing demand for synthetic fibers by developing new types of auxiliary chemicals that are specifically designed for synthetic fibers. This has led to the production and use of specialty chemicals such as surfactants, dispersants, and emulsifiers, which are used to improve the performance and processing of synthetic fibers. Hence, for enhancing the properties of textiles, the demand for textile auxiliaries' market in the forecasted period.

Market Segmentation

Egypt textile auxiliaries' market is segmented based on process type, sales channels, and region. Based on the process type, the market is divided into pre-treatment, finishing, dyeing & printing. Based on the sales channel, the market is divided into indirect and direct.

Company Profiles

GB-Chem Inc., National Company for Chemical Industries (NASYDCO), LS Chemistry Co.Ltd, Texchem Egypt, and AMAGO Group are some of the key players in Egypt textile auxiliaries market.

Report Scope:

In this report, Egypt textile auxiliaries market has been segmented into the following categories, in addition to the industry trends, which have also been detailed below:

Egypt Textile Auxiliaries Market, By Process Type:

Pre-treatment

Finishing

Dyeing & Printing

Egypt Textile Auxiliaries Market, By Sales Channel:

Direct

Indirect

Egypt Textile Auxiliaries Market, By Region:

Cairo

Alexandria

Giza

Qalyubia

Port Said

Suez

Rest of Egypt

Competitive landscape

Company Profiles: Detailed analysis of the major companies in Egypt textile auxiliaries market.

Available Customizations:

With the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

Detailed analysis and profiling of additional market players (up to five).

Contents

- 1. Product Overview
 - 1.1. Market Definition
 - 1.2. Scope of the Market
 - 1.2.1. Markets Covered
 - 1.2.2. Years Considered for Study
 - 1.2.3. Key Market Segmentations

2. RESEARCH METHODOLOGY

- 2.1. Objective of the Study
- 2.2. Baseline Methodology
- 2.3. Key Industry Partners
- 2.4. Major Association and Secondary Sources
- 2.5. Forecasting Methodology
- 2.6. Data Triangulation & Validation
- 2.7. Assumptions and Limitations

3. EXECUTIVE SUMMARY

- 3.1. Overview of the Market
- 3.2. Overview of Key Market Segmentations
- 3.3. Overview of Key Market Players
- 3.4. Overview of Key Regions/Countries
- 3.5. Overview of Market Drivers, Challenges, Trends

4. VOICE OF CUSTOMER

- 4.1. Brand Awareness
- 4.2. Factor Affecting the Purchase Behaviour

5. EGYPT TEXTILE AUXILIARIES MARKET OUTLOOK

- 5.1. Market Size & Forecast
 - 5.1.1. By Value & Volume
- 5.2. Market Share & Forecast
 - 5.2.1. By Process Type (Pre-treatment, Finishing, Dyeing & Printing)
 - 5.2.2. By Sales Channel (Indirect, Direct)

5.2.3. By Region (Cairo, Alexandria, Giza, Qalyubia, Port Said, Suez, Rest of Egypt)

5.2.4. By Company (2022)

5.3. Product Market Map

6. CAIRO TEXTILE AUXILIARIES MARKET OUTLOOK

6.1. Market Size & Forecast

6.1.1. By Value & Volume

6.2. Market Share & Forecast

6.2.1. By Process Type

6.2.2. By Sales Channel

7. ALEXANDRIA EGYPT TEXTILE AUXILIARIES MARKET OUTLOOK

7.1. Market Size & Forecast

7.1.1. By Value & Volume

7.2. Market Share & Forecast

7.2.1. By Process Type

7.2.2. By Sales Channel

8. GIZA TEXTILE AUXILIARIES MARKET OUTLOOK

8.1. Market Size & Forecast

8.1.1. By Value & Volume

8.2. Market Share & Forecast

8.2.1. By Process Type

8.2.2. By Sales Channel

9. QALYUBIA TEXTILE AUXILIARIES MARKET OUTLOOK

9.1. Market Size & Forecast

9.1.1. By Value & Volume

9.2. Market Share & Forecast

9.2.1. By Process Type

9.2.2. By Sales Channel

10. PORT SAID TEXTILE AUXILIARIES MARKET OUTLOOK

10.1. Market Size & Forecast

- 10.1.1. By Value & Volume
- 10.2. Market Share & Forecast
 - 10.2.1. By Process Type
 - 10.2.2. By Sales Channel

11. SUEZ TEXTILE AUXILIARIES MARKET OUTLOOK

- 11.1. Market Size & Forecast
 - 11.1.1. By Value & Volume
- 11.2. Market Share & Forecast
 - 11.2.1. By Process Type
 - 11.2.2. By Sales Channel

12. MARKET DYNAMICS

- 12.1. Drivers
- 12.2. Challenges

13. MARKET TRENDS & DEVELOPMENTS

- 13.1. Research & Development
- 13.2. Product launch
- 13.3. Merger & Acquisition

14. EGYPT TEXTILE AUXILIARIES MARKET: SWOT ANALYSIS

15. PORTER'S FIVE FORCES ANALYSIS

- 15.1. Competition in the Industry
- 15.2. Potential of New Entrants
- 15.3. Power of Suppliers
- 15.4. Power of Customers
- 15.5. Threat of Substitute Products

16. COMPETITIVE LANDSCAPE

- 16.1. Business Overview
- 16.2. Product Offerings
- 16.3. Recent Developments

16.4. Financials (In Case of Listed Companies)

16.5. Key Personnel

16.5.1. GB-Chem Inc.

16.5.2. National Company for Chemical Industries (NASYDCO)

16.5.3. LS Chemistry Co.,Ltd

16.5.4. Texchem Egypt

16.5.5. AMAGO Group

17. STRATEGIC RECOMMENDATIONS

18. ABOUT US & DISCLAIMER

I would like to order

Product name: Egypt Textile Auxiliaries Market, By Process Type (Pre-treatment, Finishing, Dyeing & Printing), By Sales Channel (Indirect, Direct), By Region, Competition, Forecast, and Opportunities, 2028

Product link: <https://marketpublishers.com/r/E0EFBB2C7FFEEN.html>

Price: US\$ 3,500.00 (Single User License / Electronic Delivery)
