Abstracts

Europe Acetone demand stood at 1.588 Million Tonnes in 2020 and is forecast to reach 2.50 Million Tonnes by 2030, growing at a healthy CAGR of 4.44% until 2030. The growth can be attributed to the high consumption of Acetone as a solvent across various industries such as cosmetics, pharmaceuticals, adhesives, paints and coatings, etc. Besides, Acetone is available at an affordable price and offers hi-end functionality therefore, the versatile solvent is widely adopted. Moreover, rising investments by key stakeholders for capacity additions of its highly demanded derivatives such as Bisphenol A and Methyl Methacrylate are anticipated to significantly increase the demand for Acetone in Europe during the forecast period.

The unprecedented pandemic and widespread lockdowns had a devastating impact on every business, and that negatively affected the Acetone market in Europe. But by the third week of April, the demand for the solvent grew exponentially in pharmaceutical industries, smartphone manufacturing units, etc. that reinstated the demand for acetone in usual volumes.
