Abstracts

Europe Methanol demand stood at 9.71 Million Tonnes in 2020 and is forecast to reach 17.8 Million Tonnes by 2030, growing at a healthy CAGR of 6.42% until 2030.

Increasing demand for bio-based chemical commodities across various end-user industries like automotive, construction, paints and coatings, etc. is anticipated to increase Methanol preference over its other possible substitutes. Besides, demand for Methanol in Europe is likely to grow significantly during the forecast period owing to strong government support for adopting Methanol as a new generation renewable resource. Besides, the low production cost and eco-friendly attributes of Methanol are expected to drive its market growth during the forecast period.

The COVID-19 pandemic impacted businesses across the globe, reducing the demand for automobiles, paints, and coatings, etc. significantly, which resulted in a flat Europe Methanol market through 2020, with no growth. However, as renewable and green methanol technologies are gaining traction, the demand for Methanol has expanded again, which is likely to drive the Europe Methanol market during the forecast period.
