## **Abstracts**

The global fogless mirror market is anticipated to grow during the forecast period owing to the rising popularity of home décor units & bath utilities and the increasing disposable income in countries such as China and India.

Fogless mirrors, also known as anti-fog mirrors, have an electric circuit that, when turned on, stops condensation from forming on the mirrors when taking a bath or a shower. As a result, the mirror will always be evident to everyone. A reflective coating is bonded to the transparent substrate of the mirror, which also has a transparent substrate. There is at least one area of the mirror that transmits light. About the mirror, the heater element is mounted. The light assembly is positioned about the mirror so that the light it emits travels through the light-transmissive area.

These mirrors are primarily used in bathrooms to stop water droplets or fog from forming on the surface of the mirrors due running hot water taps in sinks or taking

showers. The market for these mirrors is expanding as consumers choose more fanciful and alluring accessories to decorate their homes and bathrooms.

Fogless bathroom mirrors are offered in a range of sizes and styles. Fogless mirrors are now equipped with LED lights to enhance the bathroom's overall appearance. Additionally, advanced features such as infrared on/off switches are frequently used because they are convenient.

### Rising Popularity of Concept Bathrooms to Boost the Market Demand

Sales of fogless mirrors are anticipated to rise during the projected period as a result of the development of the concept bathroom. As part of the trend toward spending more on home décor and bathroom renovations, people are encouraged to install fogless mirrors in their houses since they provide bathrooms with a good appearance and stop water droplets from collecting on the surface while taking a shower. The fogless mirror consequently does well on the global market. Additionally, there are many options for players to use social media platforms to showcase their work and influence consumer preferences for bathroom decoration. People of all ages frequently use social media sites such as Facebook and Instagram, where they may get more ideas about decoration from, home décor publications, family and friends, etc., for their rooms, kitchens, and bathrooms. Therefore, the increasing trend of modern bathrooms and home decoration is expected to drive the demand for fogless mirrors in the market during the forecast period. The 2022 U.S. Houzz Bathroom Trends Study, which analyzed information from more than 2,500 homeowners who had either finished or were in the middle of a bathroom makeover, has just been released by Houzz Inc., the online platform for home design. According to the survey, the national average cost to remodel a bathroom increased 13% over the previous year to USD 9,000. The top 10% of projects costing USD 35,000 or more had a 17% cost rise.

### Increasing Demand from Hospitality Sector Fuels the Market Growth

Fogless mirrors are another tool many hotels and resort managers use to draw customers' attention and cater to their demands in the bathroom. Hotel owners also use these mirrors to stop fogging in the winter in hill station rooms, beachside rooms, or rooms with gorgeous natural surroundings. These additional initiatives support hotel management's efforts to increase business and build a strong reputation in the neighborhood. These factors influence the fogless mirror's sales in the hospitality sector. In 2021, there were 660,936 restaurants in the US. In 2021, the US restaurant business generated sales of USD 731.5 billion. Therefore, the increasing demand for

the fogless mirror from the hospitality sector and the rapidly increasing number of hotels, restaurants, resorts, etc., are expected to drive the market for fogless mirrors worldwide during the forecast period.

### Innovative Offerings Boost the Demand for Fogless Mirrors

The businesses are also building an online presence through e-commerce platforms to expand their customer base. For instance, FAB Glass and Mirror provides free shipping and simple return and exchange through their website. Additionally, fogless mirrors can be purchased with various technologies, such as Bluetooth speakers, LED lighting, radios, etc., which enhances their cost and maintenance requirements. For instance, Venetian Image offers a Led Illuminated Bathroom Fogless Mirror. The highly sensitive sensor button can switch the mirror on or off. Customers can use Bluetooth to link the mirror to their smartphone or iPad for high-quality audio. On the back of the mirror is where the Bluetooth speaker is concealed. The anti-fog feature continues to function as long as the LED light is on.

### Market Segmentation

The global fogless mirror market is segmented into product type, end-use, shape, distribution channel, and region. On the basis of type, the market is further bifurcated into portable and stable. Based on the product type, the market is further segmented into mirror cabinets, wall-mounted mirrors, table-top mirrors, and others. Based on end-use, the market is segmented into residential and commercial. Based on shape, the market is further split into rectangular, round, square, and others. Based on the distribution channel, the market is divided into supermarkets/hypermarkets, specialty stores, online, and others (direct sales). The market analysis also studies regional segmentation to devise regional market segmentation.
