## **Abstracts**

GCC Smart Cities market is anticipated to grow in the forecast period owing to rising urbanization and the increasing need for infrastructure and digital asset management. The Country is attracting numerous government investments toward developing smart cities as the digital ecosystem is improving. The upgradation in technology has fueled the adoption of the Internet of things (IoT) technology for smart cities to manage traffic flows, monitor city infrastructure, and monitor air and water quality. The rising need for ensuring public safety, efficient utilization of resources, rising demand for efficient energy consumption, and a healthy environment are expected to boost the smart cities'

market growth during the forecast period.

The Middle East has a fertile ground for Smart Cities, especially in the six countries of the GCC. Two evolving verticals include, smart transport and smart lighting are key drivers of the rapidly growing Internet of Things worldwide and are also beginning to make a difference in the GCC. The six Gulf Cooperation Council (GCC) countries embrace the smart city framework to address their urban challenges. The GCC countries are the most urbanized countries across the globe. A decade and a half of a booming oil and gas industry have provided resources for urban modernization to governments across the Country. But the specter of the current lower oil prices continuing has created a sense of urgency. GCC countries are looking at ways to become more efficient and diversify their economies away from oil dependency. Smart-city technology is an essential aspect of this new journey.

In urban population growth, the demand for effective urban management is increasing at a rapid rate. The rising concerns for city management and its development are also relevant for the GCC countries. The GCC countries are highly urbanized, and by 2050 more than 90% of the population of these countries is expected to be settled in the cities. The rate of urban population for GCC countries is expected to reach 93.2% for Bahrain, 100% for Kuwait, 81.4% for Oman, 99.7% for Qatar, 90.4% for Saudi Arabia, and 92.4% for UAE by 2050. The main factors considered for a smart city are identified by a set of indicators: public expenditure on R&D, GDP growth rate, public expenditure on education, and income level. Some scholars describe economic and socio-political issues of the city, innovation, and others as the leading indicators of smart cities. From an economic point of view, the success factor for smart city development can be measured by GDP, sector strength, international transactions, and foreign investment. The main factors of the smart city in ranking medium-sized European cities were economy, mobility, environment, people, and governance.

**On-going Developments in Infrastructure Sector are Fueling the Market Growth**

The countries of the GCC have been witnessing massive growth in the development of the infrastructure sector. Moreover, implementation of major economic reforms by the governments, including transformations to the ease of doing business, encouraging new business and getting construction permits. These changes and development in the GCC region are anticipated to boost the adoption of smart cities. A smart city adopts top-notch technologies incorporating comprehensive IT infrastructure, a network of sensors, cameras, and data centers for the effective conveyance of essential services such as electricity, water supply, sanitation, etc. With the development of the infrastructure

sector, the implementation of smart cities is expected to benefit by employing automation and enhanced data connectivity. For instance, the Ministry of Municipality and Environment of Qatar allocated USD 7.0 billion in its 2021 budget to further develop major infrastructure projects and water and electricity networks, in addition to continuing the work of maintenance, development, and expansion of roads.

### Increasing Government Initiatives are Driving the Market Growth

The Government of GCC is taking many initiatives to promote the implementation of smart cities in the upcoming years. For instance, The Saudi government launched the Middle East Green Initiative to create a sustainable future for the country and to highlight green transition policy solutions. The initiative will help to improve people's lives and protect future generations by increasing reliance on clean energy, protecting the environment, and mitigating the effects of oil use. Additionally, to multiple efforts to preserve the marine and coastal environment, increase the percentage of natural reserves, and improve quality of life, the initiative aims to improve the efficiency of oil production and increase the contribution of renewable energy.

### Growing Smart City Initiatives across GCC is Driving the Market Growth

Smart Cities are an important part of the national development strategies of each GCC country. At the same time, the key goal of developing smart cities is not just effective management but mainly improving the level and quality of life of citizens.

### Market Segmentation

The GCC Smart Cities Market is fragmented into smart mobility, smart buildings, smart utility, smart citizen service, and country. Based on smart mobility, the market is fragmented into smart ticketing, traffic management, passenger information management, connected logistics, and others. Based on smart building, the market is segmented into building infrastructure management, security & emergency management, energy management, network management, and integrated workplace management system. Based on smart utility, the market is divided into advanced metering infrastructure, meter data management, distribution management system, substation automation, and others. Based on smart citizen service, the market is divided into smart healthcare, smart education, smart public safety, smart street lighting, and others. Based on the country, the market is fragmented into UAE, Bahrain, Saudi Arabia, Oman, Qatar, and Kuwait.

## Company Profiles

Siemens AG, Cisco Systems Inc., IBM Corporation, Microsoft Corporation, Schneider Electric, Intel Corporation, ABB Limited, Telefonaktiebolaget LM Ericsson, Oracle Corporation, and Fujitsu Limited are among the major market players in the country platform that lead the market growth of the GCC Smart Cities market.

## Report Scope:

In this report, the GCC Smart Cities market has been segmented into the following categories, in addition to the industry trends, which have also been detailed below:

### GCC Smart Cities Market, By Smart Mobility:

Smart Ticketing

Traffic Management

Passenger Information Management

Connected Logistics

Others

### GCC Smart Cities Market, By Smart Building:

Building Infrastructure Management

Security & Emergency Management

Energy Management

Network Management

Integrated Workplace Management System

### GCC Smart Cities Market, By Smart Utility:

Advanced Metering Infrastructure

Meter Data Management

Distribution Management System

Substation Automation

Others

GCC Smart Cities Market, By Smart Citizen Service:

Smart Healthcare

Smart Education

Smart Public Safety

Smart Street Lighting

Others

GCC Smart Cities Market, By Country:

UAE

Bahrain

Saudi Arabia

Oman

Qatar

Kuwait

Competitive Landscape

### 10.3. Policy & Regulatory Landscape

## **11. QATAR SMART CITIES MARKET OUTLOOK**

### 11.1. Market Size & Forecast

#### 11.1.1. By Value

## 11.2. Market Share & Forecast

11.2.1. By Smart Mobility

11.2.2. By Smart Building

11.2.3. By Smart Utility

11.2.4. By Smart Citizen Service

## 11.3. Policy & Regulatory Landscape

## 12. KUWAIT SMART CITIES MARKET OUTLOOK

### 12.1. Market Size & Forecast

12.1.1. By Value

### 12.2. Market Share & Forecast

12.2.1. By Smart Mobility

12.2.2. By Smart Building

12.2.3. By Smart Utility

12.2.4. By Smart Citizen Service

### 12.3. Policy & Regulatory Landscape

## 13. MARKET DYNAMICS

### 13.1. Drivers

13.1.1. On-going Developments in Infrastructure Sector

13.1.2. Increasing Government Initiatives

13.1.3. Growing Smart City Initiatives across GCC

### 13.2. Challenges

13.2.1. Security Concerns

13.2.2. High Initial Cost

## 14. MARKET TRENDS & DEVELOPMENT

14.1. Need for Efficient Management

14.2. Increasing Demand for a Healthy Environment

14.3. Rising Government Investments

14.4. Rising Population & Urbanization

14.5. Merger & Acquisitions

## 15. COMPANY PROFILES

15.1. Siemens AG

- 15.1.1. Business Overview
- 15.1.2. Key Revenue and Financials (If Available)
- 15.1.3. Recent Developments
- 15.1.4. Key Personnel
- 15.1.5. Key Product/Services
- 15.2. Cisco Systems Inc.
  - 15.2.1. Business Overview
  - 15.2.2. Key Revenue and Financials (If Available)
  - 15.2.3. Recent Developments
  - 15.2.4. Key Personnel
  - 15.2.5. Key Product/Services
- 15.3. IBM Corporation
  - 15.3.1. Business Overview
  - 15.3.2. Key Revenue and Financials (If Available)
  - 15.3.3. Recent Developments
  - 15.3.4. Key Personnel
  - 15.3.5. Key Product/Services
- 15.4. Microsoft Corporation
  - 15.4.1. Business Overview
  - 15.4.2. Key Revenue and Financials (If Available)
  - 15.4.3. Recent Developments
  - 15.4.4. Key Personnel
  - 15.4.5. Key Product/Services
- 15.5. Schneider Electric
  - 15.5.1. Business Overview
  - 15.5.2. Key Revenue and Financials (If Available)
  - 15.5.3. Recent Developments
  - 15.5.4. Key Personnel
  - 15.5.5. Key Product/Services
- 15.6. Intel Corporation
  - 15.6.1. Business Overview
  - 15.6.2. Key Revenue and Financials (If Available)
  - 15.6.3. Recent Developments
  - 15.6.4. Key Personnel
  - 15.6.5. Key Product/Services
- 15.7. ABB Limited
  - 15.7.1. Business Overview
  - 15.7.2. Key Revenue and Financials (If Available)
  - 15.7.3. Recent Developments

- 15.7.4. Key Personnel
- 15.7.5. Key Product/Services
- 15.8. Telefonaktiebolaget LM Ericsson
  - 15.8.1. Business Overview
  - 15.8.2. Key Revenue and Financials (If Available)
  - 15.8.3. Recent Developments
  - 15.8.4. Key Personnel
  - 15.8.5. Key Product/Services
