Abstracts

Increasing industrialization across the globe is degrading the quality of air. Expanding vehicle fleet and increasing number of active smokers have further contributed to the decline in air quality. Due to depleting air quality, people are increasingly countering health risks such as asthma, lung cancer, and respiratory and cardiovascular diseases. Air purifiers, initially considered a luxury product, are now emerging as a necessity to avoid contracting various air-borne infections. In view of these factors, the demand for air purifiers has been increasing globally over the last few years. With rise in disposable income and change in lifestyle people are more willing to invest in air purifiers. Over the next five years, global air purifiers market is anticipated to witness strong growth on account of increasing adoption of air purifiers across all segments including residential, commercial and industrial.

According to “Global Air Purifiers Market Forecast & Opportunities, 2020”, the market for air purifiers across the globe is projected to grow at a CAGR of over 14% through 2020. Although commercial and industrial sectors are the major end user segments generating significant demand for air purifiers, residential sector is expected to witness highest growth over the next five years. Global air purifiers market is dominated by High Efficiency Particulate Air (HEPA) based air purifiers, followed by activated carbon, ion & ozone and electrostatic precipitator based air purifiers. Some air purifier manufacturing companies are also offering air purifiers incorporating both HEPA and activated carbon filter technologies. The major players in global air purifiers market include IQAir, Honeywell, and Philips, among others. “Global Air Purifier Market Forecast & Opportunities, 2020” discusses the following aspects of global air purifiers market:
