Abstracts

Global Benzene demand stood at 52.94 Million Tonnes in 2020 and is forecast to reach 78.03 Million Tonnes by 2030, growing at a healthy CAGR of 3.81% until 2030.

Benzene is a colorless organic compound. It is widely used as a chemical intermediate to produce a wide range of chemicals such as ethylbenzene, cumene, cyclohexane, nitrobenzene, linear alkyl benzene, etc. Growing consumption of Benzene derivatives in the automotive industry for manufacturing synthetic rubber has increased Benzene demand in the global market and the product demand is anticipated to increase further due to robust growth in the automotive market. Benzene is majorly being produced by Pygas followed by Naphtha reformat. Elevating demand for Cumene to produce acetone with applications in automotive and architectural industries is also contributing to the growth of the Global Benzene market. Rising demand for rubber processing chemicals, nylon reins and synthetic fibers is also fascinating the downstream market of Benzene derivatives. Ethylbenzene, one of Benzene's derivatives, finds application in producing styrene and growing demand of styrene-based polymers such as polystyrene, styrene acrylonitrile reins acrylonitrile butadiene styrene rubber in the disposable medical devices and consumer electronics is also boosting Benzene market globally. Amongst the five regions (Asia-Pacific, Europe, North America, Middle East & Africa and South America), Asia Pacific region holds the largest volume share of global Benzene market. Recently, working from home imposed by the government due to COVID-19 could fall gasoline demand. Moreover, working from home is boosting greater usage of home food delivery, online shopping, electronic devices, and electrical appliances, which will contribute to Benzene's spurring demand during the forecast period.

Being one of the widely used organic compounds in the petrochemical industry, benzene market suffered a major hit from the global economic recession caused by COVID-19. Significant drops in sales of aromatic products, consumer appliances, fabrics, electronic components, etc. led to a significantly reduced demand for benzene. However, as the world is gradually unwinding, there has been a rise in benzene prices with increased demand from multiple sectors.

Years Considered for this Report:

Historical Years: 2015 – 2019

Base Year: 2020

Estimated Year: 2021

Forecast Period: 2022 – 2030

This report will be delivered on an online digital platform with one-year subscription and quarterly update.

Objective of the Study:

The primary objective of the study was to evaluate and forecast Benzene capacity, production, demand and demand – supply gap globally.

To categorize Benzene demand based on end use, region and sales channel.

To study company shares in Global Benzene market.

To identify major customers of Benzene globally.

To evaluate and forecast Benzene pricing in Global Benzene market.

To identify and profile major companies operating in Global Benzene market.

To identify major news, deals and expansion plans in Global Benzene market.

Royal Dutch Shell Plc., China National Petroleum Corporation (Sinopec), Saudi Basic Industries Corporation, ExxonMobil Corporation, JX Holdings, Inc., GS Caltex, Haldia Petrochemicals Limited, Reliance Industries Limited, Indian Oil Corporation Limited, Bharat Petroleum Corporation Limited etc., are some of the leading players operating in the Global Benzene market.

To extract data for Global Benzene market, primary research surveys were conducted with Benzene manufacturers, suppliers, distributors, wholesalers and end users. While interviewing, the respondents were also inquired about their competitors. Through this technique, ChemAnalyst was able to include manufacturers that could not be identified due to the limitations of secondary research. Moreover, ChemAnalyst analyzed various end user segments and projected a positive outlook for Global Benzene market over the coming years.

ChemAnalyst calculated Benzene global demand by analyzing the historical data and demand forecast was carried out considering crude oil prices. ChemAnalyst sourced these values from industry experts and company representatives and externally validated through analyzing historical sales data of respective manufacturers to arrive at the overall market size. Various secondary sources such as company websites, association reports, annual reports, etc., were also studied by ChemAnalyst.

Key Target Audience:

Benzene manufacturers and other stakeholders

Organizations, forums and alliances related to Benzene distribution

Government bodies such as regulating authorities and policy makers

Market research and consulting firms

The study is useful in providing answers to several critical questions that are important for industry stakeholders, such as Benzene manufacturers, distributors, importers and end users. The report also provides useful insights about which market segments should be targeted over the coming years to strategize investments and capitalize on growth opportunities.

Report Scope:

Global Benzene Market Analysis: Plant Capacity, Production, Operating Efficiency, Demand & Supply, Technology,...

In this report, the Global Benzene market has been segmented into following categories, in addition to the industry trends which have also been detailed below:

Market, by End Use - Ethylbenzene, Cumene, Cyclohexane, Nitrobenzene and Others (Linear Alkyl Benzene, Maleic Anhydride etc.)

Market, by Sales Channel - Direct/Institutional Sales, Indirect Sales

Market, by Region - APAC, Europe, North America, MEA, South America

Available Customizations:

With the given market data, ChemAnalyst offers customizations according to a company's specific needs.
