Abstracts

According to “Global Chlorine Dioxide Generators Market By Type, By Application, By Region, Competition Forecast & Opportunities, 2013 – 2023” chlorine dioxide generators market is projected to reach \$ 2.1 billion by 2023, on account of diversified applications of chlorine dioxide generators in the field of municipal drinking and wastewater treatment, pulp and textile bleaching, farming, etc. Chlorine dioxide generators are being widely used in the food & beverage sector for meat disinfection and washing bottles, fruits and vegetables, while in the oil & gas sector, they are used to control microbial activity in oil fields. Moreover, technological developments, growing demand for safe drinking water and increasing emphasis on the reuse and recycling of wastewater in the industrial sector are expected to positively influence the chlorine dioxide generators market, globally, during the forecast period. Some of the major players operating in the global chlorine dioxide generators market include Ecolab Inc., ProMinent GmbH, Grundfos Holding A/S, IEC Fabchem Limited, Dioxide Pacific, Iotronic Elektroger?tebau GmbH, CDG Environmental LLC, Sabre Energy Services LLC, TECME SRL, AquaPulse Systems Inc., Bio-Cide International, Inc., Evoqua Water Technologies LLC, and Beijing Delianda Technology Development Co. Ltd, among others. “Global Chlorine Dioxide Generators Market By Type, By Application, By Region, Competition Forecast & Opportunities, 2013 – 2023” discusses the following aspects of chlorine dioxide generators market globally:

Chlorine Dioxide Generators Market Size, Share & Forecast

Segmental Analysis – By Type (2-Chemical, 3-Chemical & Electrochemical), By Application (Municipal Drinking Water, Food & Beverage, Municipal Wastewater & Others), By Region

Competitive Analysis

Changing Market Trends & Emerging Opportunities

Why You Should Buy This Report?

To gain an in-depth understanding of chlorine dioxide generators in globally

To identify the on-going trends and anticipated growth in the next five years

To help industry consultants, chlorine dioxide generators distributors and other stakeholders align their market-centric strategies

To obtain research-based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get the research data or trends added in the report as per the buyer's specific needs

Report Methodology

The information contained in this report is based upon both primary and secondary research. Primary research included interaction with chlorine dioxide generators distributors and industry experts. Secondary research included an exhaustive search of relevant publications like company annual reports, financial reports and proprietary databases.
