Abstracts

According to “Global Connected Car Devices Market By Communication Type, By Product Type, By Vehicle Type, By Connectivity Type, By Region, Competition Forecast & Opportunities, 2022”, connected car devices market is projected to surpass \$74 billion by 2022, on account of increasing demand for connected car devices owing to rapidly evolving policy and regulatory framework supported by rising safety concerns. Growth in the market is also anticipated on the back of technological developments and increasing demand for incorporation of smart features in vehicles. Moreover, huge investments by major companies in connected car device technologies are anticipated to aid the global connected car devices market over the coming years. Few of the renowned companies operating in the global connected car devices market are Harman International Industries Inc., Continental AG, Panasonic Corporation, Visteon Corporation, DENSO Corporation, ZF Friedrichshafen AG, Delphi Automotive PLC, and Valeo S.A. “Global Connected Car Devices Market By Communication Type, By Product Type, By Vehicle Type, By Connectivity Type, By Region, Competition Forecast & Opportunities, 2022” discusses the following aspects of connected car devices market globally:

Connected Car Devices Market Size, Share & Forecast

Segmental Analysis – By Type (Online Vs. Offline), By Application (Commercial, Industrial & Residential), By Rating (Less than 5kVA, 5.1kVA-50kVA, 50.1kVA-200kVA & Above 200kVA)

Competitive Analysis

Changing Market Trends & Emerging Opportunities

Why You Should Buy This Report?

To gain an in-depth understanding of connected car devices in global market

To identify the on-going trends and anticipated growth in the next five years

To help industry consultants, connected car devices manufacturers, distributors and other stakeholders align their market-centric strategies

To obtain research based business decisions and add weight to presentations and marketing material

To gain competitive knowledge of leading market players

To avail 10% customization in the report without any extra charges and get the research data or trends added in the report as per the buyer's specific needs

Report Methodology

The information contained in this report is based upon both primary and secondary research. Primary research included interaction with connected car devices manufacturers, distributors and industry experts. Secondary research included an exhaustive search of relevant publications like company annual reports, financial reports and proprietary databases.
